#### Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

#### Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations et les autres organismes du Canada. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Table des matières

#### Introduction

The 2001 Census Area Profiles are designed to provide a statistical overview, or profile, for lower levels of geography. Each publication in this series provides a profile of census divisions (CDs) and census subdivisions (CSDs) in a province or territory. The Area Profiles are based on data collected by the 2001 Census of Canada from all households.

In response to client needs, variables from the 20% database are available sooner than ever before. The 2001 Census Area Profiles contain population counts for characteristics from both 100% data and 20% sample data, in each publication. New for 2001 are data on language used at work, generation status, and religion, the latter being reported every 10 years. This series also contains incidence reporting for single- or multiple-response variables. Incidence reporting will display specific categories based on the most frequently reported responses in a province or territory. The variables affected by incidence reporting are mother tongue, home language, knowledge of non-official languages, language used at work, and ethnic origin. On the whole, searching for 2001 Census information on your community can now be done sooner and at a greater level of detail.

Each publication in this series consists of a single table displaying the data for geographic areas in a columnar format. The data variables, also referred to as "stubs", are displayed in English on the left side of the table and in French on the right side. With the combination of variables from the 100% and 20% databases, the stubset covers 10 pages. Characteristics of the data have been grouped into blocks by theme, or universe (i.e. population, dwelling and household, family and income). Within each theme, the data are displayed showing different characteristics such as marital status, ethnic origin and census family structure and size.

The geographic headings run across the top of the page. The CDs are presented in alphabetical order for each province or territory. For each CD, the CSDs are again listed alphabetically. Columns containing the data for Canada and the province or territory are also shown. Reference maps showing CDs and CSDs are published separately.

Definitions of the geographic areas and variables displayed in each publication can be found in the Reference Material section. Also provided at the end of each publication are data quality notes and special notes.

#### Introduction

Les Profils des secteurs du recensement de 2001 sont conçus de façon à fournir un aperçu statistique, ou profil, de petites régions géographiques. Chaque publication de cette série fournit un profil des divisions de recensement (DR) et des subdivisions de recensement (SDR) d'une province ou d'un territoire. Les Profils des secteurs sont fondés sur les données du Recensement du Canada de 2001 pour tous les ménages.

En réponse aux besoins des clients, les variables de la base de données-échantillon (20 %) sont disponibles plus tôt qu'elles ne l'ont jamais été. Les Profils des secteurs du recensement de 2001 contiennent les chiffres de la population selon des caractéristiques des données intégrales (100 %) et des données-échantillon (20 %), réunies dans chaque publication. Du nouveau pour 2001 : il y a des données portant sur la langue utilisée au travail, le statut des générations et la religion, cette dernière étant déclarée tous les 10 ans. Cette série comprend également des fréquences de déclaration pour les variables à réponses uniques et à réponses multiples. La fréquence de déclaration verra certaines catégories présentées selon les réponses le plus souvent déclarées dans une province ou un territoire. Les variables touchées par la fréquence de déclaration sont la langue maternelle, la langue parlée à la maison, la connaissance des langues non officielles, la langue utilisée au travail et l'origine ethnique. En somme, vous pouvez dorénavant rechercher les informations du recensement de 2001 portant sur votre communauté plus tôt qu'auparavant, et à un niveau plus détaillé.

Chaque publication de cette série consiste en un seul tableau auquel figurent, sous forme de colonnes, les données pour les régions géographiques. Les variables de données, ou « titres », sont affichées en anglais du côté gauche du tableau et en français du côté droit. L'ensemble de titres résultant de la combinaison des variables provenant de la base de données intégrales (100 %) et de la base de données-échantillon (20 %) compte 10 pages. Les caractéristiques des données ont été regroupées en blocs, selon des thèmes ou univers (par exemple, la population, les logements et les ménages, les familles et le revenu). À partir de chacun de ces thèmes, les données sont affichées de façon à souligner les diverses caractéristiques telles l'état matrimonial, l'origine ethnique et la structure et la taille de la famille de recensement.

Les en-têtes géographiques figurent d'un côté à l'autre du haut de la page. Les DR sont présentées selon l'ordre alphabétique pour la province ou le territoire dont il est question. Pour chacune des DR, les SDR sont, une fois de plus, listées selon l'ordre alphabétique. Les colonnes contenant les données pour le Canada et la province ou le territoire sont également présentes. Les cartes de référence présentant les DR et les SDR sont publiées séparément.

Les définitions des régions géographiques et des variables comprises dans chaque publication apparaissent dans la section sur les documents de référence. On retrouve aussi les notes sur la qualité des données et les notes spéciales à la fin de chaque publication.

## **Symbols**

The following standard symbols are found in this publication.

- ... Figures not appropriate or not applicable.
- Nil or zero.
- XXX Figures suppressed to protect confidentiality.
- A 1996 adjusted count; most of these are the result of boundary changes.
- ¶ Incompletely enumerated Indian reserve or Indian settlement (suppressed).
- † Excludes census data for one or more incompletely enumerated Indian reserves or Indian settlements.
- Data quality index showing, for the short census questionnaire (100% data), a global non-response rate higher than or equal to 5% but lower than 10%.
- Data quality index showing, for the short census questionnaire (100% data), a global non-response rate higher than or equal to 10% but lower than 25%.
- Data quality index showing, for the short census questionnaire (100% data), a global non-response rate higher than or equal to 25% (suppressed).
- An error exists in the 2001 population and dwelling counts for this area. For further information, refer to the "Special Notes" section.
- Data quality index showing, for the long census questionnaire (20% sample data), a global nonresponse rate higher than or equal to 5% but lower than 10%.
- Data quality index showing, for the long census questionnaire (20% sample data), a global nonresponse rate higher than or equal to 10% but lower than 25%.
- Ods Data quality index showing, for the long census questionnaire (20% sample data) or the short census questionnaire (100% data), a global non-response rate higher than or equal to 25% (suppressed).

## Signes conventionnels

Les signes conventionnels suivants sont retrouvés dans cette publication.

- ... N'ayant pas lieu de figurer.
- Néant ou zéro.
- XXX Nombres supprimés afin de protéger la confidentialité.
- A Chiffre de 1996 rajusté; la plupart de ces rajustements sont le résultat de modifications des limites.
- ¶ Réserve indienne ou établissement indien partiellement dénombré (supprimées).
- † Ne comprend pas les données du recensement pour une ou plusieurs réserves indiennes ou établissements indiens partiellement dénombrés.
- Indice de la qualité des données indiquant, pour le questionnaire de recensement abrégé (données intégrales [100 %]), un taux global de non-réponse supérieur ou égal à 5 %, mais inférieur à 10 %.
- ♦♦ Indice de la qualité des données indiquant, pour le questionnaire de recensement abrégé (données intégrales [100 %]), un taux global de non-réponse supérieur ou égal à 10 %, mais inférieur à 25 %.
- ♦♦♦ Indice de la qualité des données indiquant, pour le questionnaire de recensement abrégé (données intégrales [100 %]), un taux global de non-réponse supérieur ou égal à 25 % (supprimées).
- Il y a une erreur dans les chiffres de population et des logements de 2001 pour cette région. Pour de plus amples renseignements, veuillez consulter la section « Notes spéciales ».
- Indice de la qualité des données indiquant, pour le questionnaire de recensement complet (donnéeséchantillon [20 %]), un taux global de non-réponse supérieur ou égal à 5 %, mais inférieur à 10 %.
- Indice de la qualité des données indiquant, pour le questionnaire de recensement complet (donnéeséchantillon [20 %]), un taux global de non-réponse supérieur ou égal à 10 %, mais inférieur à 25 %.
- Indice de la qualité des données indiquant, pour le questionnaire de recensement complet (donnéeséchantillon [20 %]) ou pour le questionnaire de recensement abrégé (données intégrales [100 %]), un taux global de non-réponse supérieur ou égal à 25 % (supprimées).

# **Footnotes**

- (1) Based on 2001 area. These figures have not been subjected to random rounding.
- (2) These figures have not been subjected to random rounding.
- (3) Includes institutional residents.
- (4) Excludes institutional residents. These data are based on weighted sample data (20%). In some instances, due to weighting factors, it is possible for small areas to have an "estimated population excluding institutional residents" higher than the "population including institutional residents".
- (5) Non-official language categories are based on the most frequently reported responses in the province or territory. When zero values are obtained for most of the non-official languages in some geographic areas, the number of non-official languages shown is less.
- (6) This is a subtotal of all non-official languages collected by the census that are not displayed separately here.
- (7) Indicates the number of respondents reporting knowledge of each of these non-official languages.
- (8) The official language minority is English in Quebec and French in all other provinces and territories.
- (9) This table shows total response counts for the 15 most frequently reported ethnic origins in the province or territory where this census division or census subdivision is located. Total responses indicate the number of respondents who reported each ethnic origin, either as their only response or in addition to one or more other ethnic origins. Total responses represent the sum of single ethnic origin responses and multiple ethnic origin responses received in the census.
- (10) Refers to those persons identifying with at least one Aboriginal group, i.e. North American Indian, Métis or Inuit (Eskimo), and/or those who reported being a Treaty Indian or a Registered Indian as defined by the Indian Act of Canada and/or who were members of an Indian Band or First Nation

# Renvois

- (1) Selon la superficie de 2001. Ces chiffres n'ont pas fait l'objet d'un arrondissement aléatoire.
- (2) Ces chiffres n'ont pas fait l'objet d'un arrondissement aléatoire.
- (3) Comprend les pensionnaires d'un établissement institutionnel.
- (4) Ne comprend pas les pensionnaires d'un établissement institutionnel. Ces données sont basées sur les données-échantillon pondérées (20 %). Dans certains cas, en raison des coefficients de pondération, il est possible que, dans les petites régions, « l'estimation de la population ne comprenant pas les pensionnaires d'un établissement institutionnel » soit plus élevée que « la population comprenant les pensionnaires d'un établissement institutionnel ».
- (5) Les catégories de langues non officielles sont basées sur les réponses le plus souvent déclarées dans la province ou le territoire. Le nombre de langues non officielles présentées est moindre lorsque des valeurs égales à zéro sont obtenues pour la plupart des langues non officielles dans certaines régions géographiques.
- (6) Ceci est un sous-total de toutes les langues non officielles recueillies par le recensement qui ne sont pas affichées séparément ici.
- (7) Indique le nombre de répondants qui ont indiqué avoir une connaissance de chacune de ces langues non officielles.
- (8) Au Québec, la langue officielle minoritaire est l'anglais, et dans les autres provinces et territoires, la langue officielle minoritaire est le français.
- (9) Ce tableau présente les chiffres des réponses totales des 15 origines ethniques le plus souvent déclarées pour la province ou le territoire de cette division de recensement ou de cette subdivision de recensement. Le total des réponses correspond au nombre de recensés ayant indiqué chaque origine ethnique, soit comme étant leur seule réponse ou comme étant associée à une autre origine ethnique ou plus. Le total des réponses représente la somme des réponses uniques portant sur l'origine ethnique et des réponses multiples portant sur l'origine ethnique déclarées dans le cadre du recensement.
- (10) S'entend des personnes ayant déclaré appartenir à au moins un groupe autochtone, c'est-à-dire Indien de l'Amérique du Nord, Métis, ou Inuit (Esquimau) et/ ou ayant déclaré être un Indien des traités ou un Indien inscrit aux termes de la Loi sur les Indiens du Canada et/ou ayant déclaré être membre d'une bande indienne ou d'une première nation.

- (11) Refers to those persons who reported at least one Aboriginal origin (North American Indian, Métis or Inuit) to the ethnic origin question. Ethnic origin refers to the ethnic or cultural group(s) to which the respondent's ancestors belong. Additional information on ethnic origin can be obtained from the 2001 Census Dictionary.
- (12) Registered or Treaty Indian: The expression "Registered Indian" refers to those persons who reported they were registered under the *Indian Act* of Canada. Treaty Indians are persons who are registered under the *Indian Act* and can prove descent from a Band that signed a treaty.

The Registered Indian counts in this table may differ from the administrative counts maintained by the Department of Indian Affairs and Northern Development, with the most important causes of these differences being the incompletely enumerated Indian reserves and Indian settlements as well as methodological and conceptual differences between the two sources.

- (13) Includes respondents who reported a write-in response classified as a visible minority such as "Polynesian", "Guyanese", "Mauritian", etc.
- (14) Includes respondents who reported more than one visible minority group by checking two or more markin circles, e.g. "Black" and "South Asian".
- (15) Includes those who reported dual citizenship including Canadian.
- (16) Refers to people who are, or have been, landed immigrants in Canada. A landed immigrant is a person who has been granted the right to live in Canada permanently by immigration authorities. Some immigrants have resided in Canada for a number of years, while others are recent arrivals. Most immigrants are born outside Canada, but a small number were born in Canada.
- (17) "Other Europe" includes Southern Europe, Eastern Europe, Northern and Western Europe, excluding the United Kingdom. Data not directly comparable to censuses prior to 1996, where Europe included Cyprus and the U.S.S.R. In 1996 and 2001, Cyprus and the former Soviet republics of Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan are included in Asia.
- (18) "Other" includes Greenland, Saint Pierre and Miquelon, the category "Other country", as well as immigrants born in Canada.
- (19) Refers to persons who, at the time of the census, held a student or employment authorization, Minister's permit or who were refugee claimants, as well as family members living with them.

- (11) Personne ayant indiqué appartenir à au moins un groupe autochtone à la question sur l'origine ethnique, c'est-à-dire Indien de l'Amérique du Nord, Métis ou Inuit. L'origine ethnique se rapporte au(x) groupe(s) ethnique(s) ou culturel(s) auquel (auxquels) appartenaient les ancêtres du recensé. Pour de plus amples renseignements au sujet de l'origine ethnique, veuillez consulter le Dictionnaire du recensement de 2001
- (12) Indien inscrit ou Indien des traités: Les Indiens inscrits sont des personnes ayant déclaré être inscrites en vertu de la Loi sur les Indiens du Canada. Les Indiens des traités sont des personnes qui sont inscrites en vertu de la Loi sur les Indiens et qui peuvent démontrer qu'elles descendent d'une bande qui a signé un traité.

Il est possible que les nombres d'Indiens inscrits qui figurent dans le présent tableau ne concordent pas avec les chiffres du ministère des Affaires indiennes et du Nord canadien, les divergences étant surtout attribuables au dénombrement partiel des réserves indiennes et des établissements indiens et à la diversité des méthodes et concepts adoptés.

- (13) Comprend les répondants ayant fourni une réponse écrite classifiée comme faisant partie des minorités visibles, p. ex. « Polynésien », « Guyanais », « Mauricien », etc.
- (14) Comprend les répondants ayant déclaré plus d'un groupe de minorités visibles en cochant au moins deux cercles, p. ex. « Noir » et « Sud-Asiatique ».
- (15) Comprend les personnes qui ont indiqué une double citoyenneté, y compris « Canadien ».
- (16) Personnes ayant le statut d'immigrant reçu au Canada, ou l'ayant déjà eu. Un immigrant reçu est une personne à qui les autorités de l'immigration ont accordé le droit de résider au Canada en permanence. Certains immigrants résident au Canada depuis un certain nombre d'années, alors que d'autres sont arrivés récemment. La plupart des immigrants sont nés à l'extérieur du Canada, mais un petit nombre d'entre eux sont nés ici.
- (17) « Autre Europe » comprend l'Europe méridionale, l'Europe orientale, l'Europe septentrionale et l'Europe occidentale excluant le Royaume-Uni. Les données ne sont pas directement comparables avec celles des recensements antérieurs à celui de 1996, alors que l'Europe comprenait Chypre et l'URSS. En 1996 et en 2001, Chypre et les anciennes républiques soviétiques d'Arménie, d'Azerbaïdjan, de Géorgie, du Kazakhstan, du Kirghizistan, d'Ouzbékistan, du Tadjikistan et du Turkménistan sont comprises dans l'Asie.
- (18) « Autre » comprend le Groenland, Saint-Pierre-et-Miquelon, la catégorie « Autre pays » ainsi que les immigrants nés au Canada.
- (19) Personnes qui, au moment du recensement, étaient titulaires d'un permis de séjour pour étudiants, d'un permis de travail ou d'un permis ministériel, ou qui revendiquaient le statut de réfugié, ainsi que les membres de leur famille vivant avec elles.

- (20) Includes data up to May 15, 2001.
- (21) Includes Roman Catholic, Eastern Catholic, Polish National Catholic Church, Old Catholic.
- (22) Includes mostly answers of "Christian", not otherwise stated.
- (23) Includes Baha'i, Eckankar, Jains, Shinto, Taoist, Zoroastrian and Eastern religions, not identified elsewhere.
- (24) Includes Aboriginal spirituality, Pagan, Wicca, Unity -New Thought - Pantheist, Scientology, Rastafarian, New Age, Gnostic, Satanist, etc.
- (25) Includes Agnostic, Atheist, Humanist, and No religion, and other responses, such as Darwinism, etc.
- (26) Refers to persons born outside Canada.
- (27) Refers to persons born inside Canada with at least one parent born outside Canada.
- (28) Refers to persons born inside Canada with both parents born inside Canada.
- (29) Population 1 year of age and over residing in Canada, excluding institutional residents and Canadians (military and government personnel) in households outside Canada.

The concept of "migrants" is defined at the Census Subdivision (CSD) level. For geographic levels below the CSD, such as census tracts (CTs), the distinction between the migrant and non-migrant population refers to the corresponding CSD of the CT. For example, migrants within a CT are those persons who moved from a different CSD, while non-migrants are those who moved within the same CSD, although they moved in from a different CT in the same CSD or moved within the same CT.

(30) Population 5 years of age and over residing in Canada, excluding institutional residents and Canadians (military and government personnel) in households outside Canada.

The concept of "migrants" is defined at the Census Subdivision (CSD) level. For geographic levels below the CSD, such as census tracts (CTs), the distinction between the migrant and non-migrant population refers to the corresponding CSD of the CT. For example, migrants within a CT are those persons who moved from a different CSD, while non-migrants are those who moved within the same CSD, although they moved in from a different CT in the same CSD or moved within the same CT.

- (20) Comprend les données jusqu'au 15 mai 2001.
- (21) Comprend Catholique romaine, Catholique orientale, Église catholique nationale polonaise, Vieillecatholique.
- (22) Comprend la plupart des réponses « Chrétienne » non déterminées autrement.
- (23) Comprend Baha'i, Eckankar, Djaïn, Shintoïste, Taoïste, Zoroastrienne et les religions orientales, non incluses ailleurs.
- (24) Comprend Spiritualité autochtone, Païenne, Wicca, Unité - Nouvelle Pensée - Panthéiste, Scientologie, Rasta, Nouvel Âge, Gnostique, Satanique, etc.
- (25) Comprend Agnostique, Athée, Humaniste et Aucune religion, et autres réponses, telles que darwiniste, etc.
- (26) Comprend les personnes nées à l'extérieur du Canada.
- (27) Comprend les personnes nées au Canada avec au moins un parent né à l'extérieur du Canada.
- (28) Comprend les personnes nées au Canada de parents qui sont nés au Canada.
- (29) Population de 1 an et plus résidant au Canada, à l'exclusion des pensionnaires d'un établissement institutionnel et des Canadiens (militaires et fonctionnaires) appartenant à un ménage à l'extérieur du Canada.

Le concept de « migrants » est défini au niveau des subdivisions de recensement (SDR). Pour les niveaux géographiques inférieurs aux SDR, comme les secteurs de recensement (SR), la distinction entre la population des migrants et des non-migrants est faite au niveau de la SDR correspondant au SR. Par exemple, les migrants au sein d'un SR sont les personnes qui sont originaires d'une SDR différente, alors que les non-migrants sont celles qui ont déménagé à l'intérieur de la même SDR, même s'ils sont passés d'un SR à un autre à l'intérieur de la même SDR ou ont déménagé à l'intérieur du même SR.

(30) Population de 5 ans et plus résidant au Canada, à l'exclusion des pensionnaires d'un établissement institutionnel et des Canadiens (militaires et fonctionnaires) appartenant à un ménage à l'extérieur du Canada.

Le concept de « migrants » est défini au niveau des subdivisions de recensement (SDR). Pour les niveaux géographiques inférieurs aux SDR, comme les secteurs de recensement (SR), la distinction entre la population des migrants et des non-migrants est faite au niveau de la SDR correspondant au SR. Par exemple, les migrants au sein d'un SR sont les personnes qui sont originaires d'une SDR différente, alors que les non-migrants sont celles qui ont déménagé à l'intérieur de la même SDR, même s'ils sont passés d'un SR à un autre à l'intérieur de la même SDR ou ont déménagé à l'intérieur du même SR.

- (31) Includes "Never attended school or attended kindergarten only".
- (32) Excludes persons with a postsecondary certificate, diploma or degree. Refers to courses completed at postsecondary institutions (university or college) which normally require a high school graduation certificate or equivalent for entrance, as well as to other courses in related or similar institutions which may not require a high school graduation certificate for entrance.
- (33) Includes persons who may or may not have, in addition to a Trades certificate or diploma, some postsecondary courses without any degree, certificate or diploma.
- (34) Referred to as "Other non-university certificate or diploma" in previous censuses, this sector includes non-degree-granting institutions such as community colleges, CEGEPs, private business colleges and technical institutes.
- (35) Refers to persons who reported time spent doing one or more of the following unpaid work activities: (a) unpaid housework; (b) unpaid child care; (c) unpaid care or assistance to seniors. For example, a respondent who reported 5 to 14 hours of housework, 30 to 59 hours of child care and no hours of care or assistance to seniors would fall into the category "Housework and child care only".
- (36) Unemployed persons 15 years and over who have never worked for pay or in self-employment or who had last worked prior to January 1, 2000.
- (37) Refers to the experienced labour force: persons who, during the week prior to Census Day, were employed or unemployed who worked for pay or in selfemployment since January 1, 2000.
- (38) Includes apartments without direct ground access in buildings that have fewer than five storeys and apartments with direct ground access in buildings that have fewer than five storeys.
- (39) Includes mobile homes and other movable dwellings such as houseboats and railroad cars.
- (40) Includes households in tenant-occupied, non-farm, non-reserve dwellings with household income greater than \$0 in 2000 (i.e. excludes negative or zero household income).

- (31) Comprend la catégorie « Aucune scolarité ou uniquement l'école maternelle ».
- (32) Ne comprend pas les personnes ayant un certificat, un diplôme ou un grade postsecondaire. Désigne les cours terminés dans un établissement postsecondaire (université ou collège) qui exige habituellement comme condition d'admission un certificat d'études secondaires ou l'équivalent; il peut aussi s'agir d'autres cours dans des établissements similaires ou connexes qui ne demandent pas nécessairement comme condition d'admission un certificat d'études secondaires
- (33) Comprend les personnes pouvant avoir ou ne pas avoir des études postsecondaires partielles sans aucun grade, certificat ou diplôme, en plus d'un certificat ou un diplôme d'une école de métiers.
- (34) Désigné par l'expression « Certificat ou diplôme d'autres études non universitaires » dans les recensements précédents, ce secteur comprend tous les autres établissements ne décernant pas de grade, tels que les collèges communautaires, les cégeps, les collèges commerciaux privés et les instituts techniques.
- (35) Personnes qui ont déclaré du temps consacré à une ou plusieurs des activités de travail non rémunéré suivantes: a) travaux ménagers, sans paye ou sans salaire; b) soins aux enfants, sans paye ou sans salaire; c) soins ou aide aux personnes âgées, sans paye ou sans salaire. Par exemple, un répondant qui a déclaré 5 à 14 heures de travaux ménagers, 30 à 59 heures de soins aux enfants et aucune heure de soins ou d'aide aux personnes âgées serait classé dans la catégorie « Travaux ménagers et soins aux enfants seulement ».
- (36) Chômeurs de 15 ans et plus qui n'ont jamais travaillé à un emploi salarié ou à leur compte ou qui ont travaillé la dernière fois avant le 1er janvier 2000.
- (37) S'entend de la population active expérimentée : les personnes qui, pendant la semaine ayant précédé le jour du recensement, étaient occupées ou en chômage et qui avaient travaillé à un emploi salarié ou à leur compte depuis le 1er janvier 2000.
- (38) Comprend les appartements sans accès direct au niveau du sol dans les immeubles de moins de cinq étages et les appartements avec accès direct au niveau du sol dans les immeubles de moins de cinq étages.
- (39) Comprend les maisons mobiles et les autres logements mobiles tels que les bateaux-maisons et les wagons de chemin de fer.
- (40) Comprend les ménages ayant un revenu supérieur à 0 \$ en 2000 dans les logements non agricoles hors réserve occupés par un locataire (sont exclus les ménages ayant un revenu négatif ou nul).

(41) It should be noted that not all households spending 30% or more of incomes on shelter costs are necessarily experiencing housing affordability problems. This is particularly true of households with high incomes. There are also other households who choose to spend more on shelter than on other goods. Nevertheless, the allocation of 30% or more of a household's income to housing expenses provides a useful benchmark for assessing trends in housing affordability.

The relatively high shelter cost to household income ratios for some households may have resulted from the difference in the reference period for shelter cost and household income data. The reference period for shelter cost data (gross rent for tenants, and owner's major payments for owners) is 2001, while household income is reported for the year 2000. As well, for some households the 2000 household income may represent income for only part of a year.

- (42) Includes households in owner-occupied, non-farm, non-reserve dwellings with household income greater than \$0 in 2000 (i.e. excludes negative or zero household income).
- (43) The average number of children at home per family is calculated using the total number of children at home and the total number of families.
- (44) Non-relatives may be present.
- (45) Including loss.
- (46) For persons with income.
- (47) Percentages may not add to 100% due to rounding of the data.
- (48) Includes persons who did not work in 2000 but reported employment income.
- (49) Worked 49-52 weeks in 2000, mostly full time.
- (50) Worked less than 49 weeks or worked mostly part time in 2000.
- (51) Refers to married, opposite-sex and same-sex common-law couple families.

(41) Il convient de souligner que les ménages qui consacrent 30 % ou plus de leur revenu aux coûts d'habitation n'éprouvent pas nécessairement des problèmes d'abordabilité du logement. C'est notamment le cas des ménages ayant un revenu élevé. D'autres ménages choisissent de consacrer une plus grande part de leur revenu aux coûts d'habitation qu'à d'autres biens. Néanmoins, ce seuil (30 % ou plus du revenu du ménage consacré aux coûts d'habitation) constitue un repère utile pour l'évaluation des tendances en matière d'abordabilité du logement.

Les rapports entre les coûts d'habitation et le revenu du ménage relativement élevés pour certains ménages s'expliquent du fait que les périodes de référence utilisées pour les données sur les coûts d'habitation et pour les données sur le revenu du ménage ne sont pas les mêmes. En effet, la période de référence est l'année 2001 dans le cas des données sur les coûts d'habitation (loyer brut pour les locataires et principales dépenses de propriété pour les propriétaires), et l'année 2000 dans le cas des données sur le revenu du ménage. En outre, pour certains ménages, le revenu du ménage déclaré ne correspond qu'à une partie de l'année 2000.

- (42) Comprend les ménages ayant un revenu supérieur à 0 \$ en 2000 dans les logements non agricoles hors réserve occupés par le propriétaire (sont exclus les ménages ayant un revenu négatif ou nul).
- (43) Le nombre moyen d'enfants à la maison par famille est calculé à partir du nombre total d'enfants à la maison et du nombre total de familles.
- (44) Il peut y avoir des personnes non apparentées.
- (45) Comprend les pertes.
- (46) S'applique aux personnes ayant un revenu.
- (47) Il est possible que la somme des pourcentages ne soit pas de 100 % en raison de l'arrondissement des données.
- (48) Comprend les personnes qui n'ont pas travaillé en 2000 mais qui ont déclaré un revenu d'emploi.
- (49) A travaillé 49-52 semaines en 2000, surtout à plein temps.
- (50) A travaillé moins de 49 semaines ou a travaillé surtout à temps partiel en 2000.
- (51) Comprend les familles comptant un couple marié et les familles comptant un couple en union libre formé de partenaires de sexe opposé ou de même sexe.

- (52) Incidence of low income rates are calculated from rounded counts of low-income persons or families and the total number of persons or families. These counts have been rounded independently of the rounded counts shown in the table; thus, there may be a small difference between the rate shown and the one derived from the counts shown. Users are advised to interpret incidence of low income rates based upon small counts with caution.
- (52) Les taux de fréquence des unités à faible revenu sont calculés à partir des chiffres arrondis des personnes ou des familles à faible revenu et du nombre total de personnes ou de familles. Ces chiffres ont été arrondis séparément des chiffres arrondis figurant dans le tableau; par conséquent, il peut y avoir une légère différence entre la fréquence indiquée et une fréquence calculée à partir des chiffres figurant dans le tableau. Les utilisateurs doivent faire preuve de circonspection lorsqu'ils interprètent les fréquences des unités à faible revenu fondées sur des chiffres peu élevés.

# **Definitions**

For further information on definitions and special notes, refer to the 2001 Census Dictionary, Catalogue No. 92-378-XIE or 92-378-XPE.

# **Aboriginal Identity**

Refers to those persons who reported identifying with at least one Aboriginal group, i.e. North American Indian, Métis or Inuit (Eskimo), and/or those who reported being a Treaty Indian or a Registered Indian as defined by the *Indian Act* of Canada and/or who were members of an Indian Band or First Nation. In 1991 and previous censuses, Aboriginal persons were determined using the ethnic origin question (ancestry). The 1996 Census included a question on the individual's own perception of his/her Aboriginal identity. The 2001 Census question is the same as the one used in 1996.

#### **Aboriginal Origin**

Refers to those persons who reported at least one Aboriginal origin to the ethnic origin question (North American Indian, Métis or Inuit). Ethnic origin refers to the ethnic or cultural group(s) to which the respondent's ancestors belong. See Ethnic Origin.

# Age

Refers to the age at last birthday (as of the census reference date, May 15, 2001). This variable is derived from date of birth.

#### Age at Immigration

Refers to the age at which the respondent first obtained landed immigrant status. A landed immigrant is a person who has been granted the right to live in Canada permanently by immigration authorities.

#### **Bedrooms**

Refers to all rooms designed and furnished as bedrooms and used mainly for sleeping purposes, even though the use may be occasional (e.g. spare bedroom).

# Census Agglomeration (CA)

See the definition of Census Metropolitan Area (CMA) and Census Agglomeration (CA).

# Census Division (CD)

Census division (CD) is the general term for provincially legislated areas (such as county, municipalité régionale de comté and regional district) or their equivalents. Census divisions are intermediate geographic areas between the province level and the municipality (census subdivision).

#### Census Family

Refers to a married couple (with or without children of either or both spouses), a couple living common-law (with or without children of either or both partners) or a lone parent of any marital status, with at least one child living in the same dwelling. A couple living common-law may be of opposite or same sex. "Children" in a census family include grandchildren living with their grandparent(s) but with no parents present.

# **Census Family Status**

Refers to the classification of the population according to whether or not the persons are members of a census family.

Family persons refer to household members who belong to a census family. They, in turn, are further classified as follows:

**Spouses** refer to persons of opposite sex who are legally married to each other and living in the same dwelling.

**Common-law partners** are two persons of opposite sex or of the same sex who are not legally married to each other, but live together as a couple in the same dwelling.

Lone parent refers to a mother or a father, with no spouse or common-law partner present, living in a dwelling with one or more children.

Children refer to blood, step- or adopted sons and daughters (regardless of age or marital status) who are living in the same dwelling as their parent(s), as well as grandchildren in households where there are no parents present. Sons and daughters who are living with their spouse or common-law partner, or with one or more of their own children, are not considered to be members of the census family of their parent(s), even if they are living in the same dwelling. In addition, those sons and daughters who do not live in the same dwelling as their parent(s) are not considered members of the census family of their parent(s). The category of children can be further distinguished as follows:

**Never-married sons and/or daughters** in a census family, as used in censuses prior to 2001.

Other sons and/or daughters in a census family who would not have been included in the census family of their parents according to the previous concept.

**Grandchildren** living in the same household as their grandparent(s), with no parents present.

Non-family persons refer to household members who do not belong to a census family. They may be related to Person 1 (e.g. Person 1's sister, brother-in-law, cousin, grandparent), or unrelated to Person 1 (e.g. lodger, room-mate, employee). A person living alone is always a non-family person.

#### **Census Family Structure**

Refers to the classification of census families into married couples (with or without children of either or both spouses), common-law couples (with or without children of either or both partners), and lone-parent families by sex of parent. A couple living common-law may be of opposite or same sex. "Children" in a census family include grandchildren living with their grandparent(s) but with no parents present.

# Census Metropolitan Area (CMA) and Census Agglomeration (CA)

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 10,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data.

If the population of the urban core of a CA declines below 10,000, the CA is retired. However, once an area becomes a CMA, it is retained as a CMA even if the population of its urban core declines below 100,000. The urban areas in the CMA or CA that are not contiguous to the urban core are called the urban fringe. Rural areas in the CMA or CA are called the rural fringe.

When a CA has an urban core of at least 50,000 based on census counts, it is subdivided into census tracts. Census tracts are maintained for the CA even if the population of the urban core subsequently falls below 50,000. All CMAs are subdivided into census tracts.

#### Census Subdivision (CSD)

Census subdivision (CSD) is the general term for municipalities (as determined by provincial legislation) or areas treated as municipal equivalents for statistical purposes (for example, Indian reserves, Indian settlements and unorganized territories).

#### Census Subdivision Type

Census subdivisions (CSDs) are classified into 46 types according to official designations adopted by provincial or federal authorities. Two exceptions are "Subdivision of Unorganized" in Newfoundland and Labrador, and "Subdivision of County Municipality" in Nova Scotia, which are geographic areas created as equivalents for municipalities by Statistics Canada, in cooperation with those provinces, for the purpose of disseminating statistical data.

The **census subdivision type** accompanies the census subdivision name in order to distinguish CSDs from each other, for example, Granby, V (for the *ville* of Granby) and Granby, CT (for the *municipalité* de canton of Granby).

# Census Tract (CT)

Census tracts (CTs) are small, relatively stable geographic areas that usually have a population of 2,500 to 8,000. They are located in census metropolitan areas and in census agglomerations with an urban core population of 50,000 or more in the previous census.

A committee of local specialists (for example, planners, health and social workers and educators) initially delineates CTs in conjunction with Statistics Canada. Once a census metropolitan area (CMA) or census agglomeration (CA) has been subdivided into census tracts, the census tracts are maintained even if the urban core population subsequently declines below 50.000.

# Citizenship

Refers to the legal citizenship status of the respondent. Persons who are citizens of more than one country were instructed to provide the name of the other country(ies).

#### Class of Worker

This variable classifies persons who reported a job into the following categories:

- (a) persons who worked mainly for wages, salaries, commissions, tips, piece-rates, or payments "in kind" (payments in goods or services rather than money);
- (b) persons who worked mainly for themselves, with or without paid help, operating a business, farm or professional practice, alone or in partnership:
- (c) persons who worked without pay in a family business, farm or professional practice owned or operated by a related household member; unpaid family work does not include unpaid housework, unpaid childcare, unpaid care to seniors and volunteer work.

The job reported was the one held in the week (Sunday to Saturday) prior to enumeration (May 15, 2001) if the person was employed, or the job of longest duration since January 1, 2000, if the person was not employed during the reference week. Persons with two or more jobs in the reference week were asked to provide information for the job at which they worked the most hours.

#### Common-law Status

Refers to two people of the opposite sex or of the same sex who live together as a couple, but who are not legally married to each other.

# **Condition of Dwelling**

Refers to whether, in the judgement of the respondent, the dwelling requires any repairs (excluding desirable remodelling or additions).

# **Dwelling, Occupied Private**

Refers to a private dwelling in which a person or a group of persons is permanently residing. Also included are private dwellings whose usual residents are temporarily absent on Census Day. Unless otherwise specified, all data in housing products are for occupied private dwellings, rather than for unoccupied private dwellings or dwellings occupied solely by foreign and/or temporary residents.

# Dwelling, Private

Refers to a separate set of living quarters with a private entrance either from outside or from a common hall, lobby, vestibule or stairway inside the building. The entrance to the dwelling must be one that can be used without passing through the living quarters of someone else. The dwelling must meet the two conditions necessary for year-round occupancy:

- (a) a source of heat or power (as evidenced by chimneys, power lines, oil or gas pipes or meters, generators, woodpiles, electric lights, heating pumps, solar heating panels, etc.);
- (b) an enclosed space that provides shelter from the elements (as evidenced by complete and enclosed walls and roof, and by doors and windows that provide protection from wind, rain and snow).

The census classifies private dwellings into regular private dwellings and occupied marginal dwellings. Regular private dwellings are further classified into three major groups: occupied dwellings (occupied by usual residents), dwellings occupied by foreign and/or temporary residents and unoccupied dwellings. Marginal dwellings are classified as occupied by usual residents or by foreign and/or temporary residents. Marginal dwellings that were unoccupied on Census Day are not counted in the housing stock.

#### **Earner or Employment Income Recipient**

Refers to a person 15 years of age and over who received wages and salaries, net income from a non-farm unincorporated business and/or professional practice, and/or net farm self-employment income during calendar year 2000.

#### **Economic Family**

Refers to a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage, common-law or adoption.

#### **Ethnic Origin**

Refers to the ethnic or cultural group(s) to which the respondent's ancestors belong.

# First Official Language Spoken

Refers to a variable specified within the framework of the Official Languages Act.

#### **Highest Level of Schooling**

Refers to the highest grade or year of elementary or secondary (high) school attended, or to the highest year of university or college education completed. University education is considered to be a higher level of schooling than college education. Also, the attainment of a degree, certificate or diploma is considered to be at a higher level than years completed or attended without an educational qualification.

#### Home Language

Refers to the language spoken most often or on a regular basis at home by the individual at the time of the census.

#### **Hours Spent Doing Unpaid Housework**

Refers to the number of hours persons spent doing unpaid housework, yard work or home maintenance in the week (Sunday to Saturday) prior to Census Day (May 15, 2001). It includes hours spent doing unpaid housework for members of one's own household, for other family members outside the household, and for friends or neighbours.

Unpaid housework does not include volunteer work for a non-profit organization, a religious organization, a charity or community group, or work without pay in the operation of a family farm, business or professional practice.

# Hours Spent Looking After Children, Without Pay

Refers to the number of hours persons spent looking after children without pay. It includes hours spent providing unpaid child care for members of one's own household, for other family members outside the household, for friends or neighbours or for other family members outside the household in the week (Sunday to Saturday) prior to Census Day (May 15, 2001).

Unpaid child care does not include volunteer work for a non-profit organization, a religious organization, a charity or community group, or work without pay in the operation of a family farm, business or professional practice.

# Hours Spent Providing Unpaid Care or Assistance to Seniors

Refers to the number of hours persons spent providing unpaid care or assistance to seniors of one's own household, to other senior family members outside the household, and to friends or neighbours in the week (Sunday to Saturday) prior to Census Day (May 15, 2001).

Unpaid care or assistance to seniors does not include volunteer work for a non-profit organization, religious organization, charity or community group, or work without pay in the operation of a family farm, business or professional practice.

#### Household Living Arrangements

Refers to the classification of persons in terms of whether they are members of a family household or of a non-family household, and whether they are family or non-family persons

#### Household, Private

Refers to a person or a group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada.

#### Household Size

Refers to the number of persons in a private household.

# Household Type

Refers to the basic division of private households into family and non-family households. Family household refers to a household that contains at least one census family, that is, a married couple with or without children, or a couple living common-law with or without children, or a lone parent living with one or more children (lone-parent family). One-family household refers to a single census family (with or without other non-family persons) that occupies a private dwelling. Multiple-family household refers to a household in which two or more census families (with or without additional non-family persons) occupy the same private dwelling.

Non-family household refers to either one person living alone in a private dwelling or to a group of two or more people who share a private dwelling, but who do not constitute a census family.

#### **Immigrant Population**

Refers to people who are, or have been, landed immigrants in Canada. A landed immigrant is a person who has been granted the right to live in Canada permanently by immigration authorities. Some immigrants have resided in Canada for a number of years, while others have arrived recently. Most immigrants are born outside Canada, but a small number were born in Canada.

#### Incidence of Low Income

The incidence of low income is the proportion or percentage of economic families or unattached individuals in a given classification below the low income cut-offs. These incidence rates are calculated from unrounded estimates of economic families and unattached individuals 15 years of age and over.

#### Income Status

Refers to the position of an economic family or an unattached individual 15 years of age and over in relation to Statistics Canada's low income cut-offs (LICOs).

# Industry (Based on the 1997 North American Industry Classification System [NAICS])

Refers to the general nature of the business carried out in the establishment where the person worked. If the person did not have a job during the week (Sunday to Saturday) prior to enumeration (May 15, 2001), the data relate to the job of longest duration since January 1, 2000. Persons with two or more jobs were required to report the information for the job at which they worked the most hours.

The 2001 industry data are produced according to the 1997 NAICS. The NAICS provides enhanced industry comparability among the three North American Free Trade Agreement (NAFTA) trading partners (Canada, United States and Mexico). This classification consists of a systematic and comprehensive arrangement of industries structured into 20 sectors, 99 subsectors and 300 industry groups. The criteria used to create these categories are similarity of input structures, labour skills or production processes used by the establishment. For further information on the classification, see North American Industry Classification System, Canada, 1997. Catalogue No. 12-501-XPE.

The variable "Industry (based on the 1997 NAICS)" does not permit direct comparison to any previous census industry data. The 1980 Standard Industrial Classification should be used for comparisons between the 1986, 1991, 1996 and 2001 Censuses.

# **Knowledge of Non-official Languages**

Refers to languages, other than English or French, in which the respondent can conduct a conversation.

#### **Knowledge of Official Languages**

Refers to the ability to conduct a conversation in English only, in French only, in both English and French, or in neither of the official languages of Canada.

# Labour Force Activity (in Reference Week)

Refers to the labour market activity of the population 15 years of age and over in the week (Sunday to Saturday) prior to Census Day (May 15, 2001). Respondents were classified as either employed, or unemployed, or as not in the labour force. The labour force includes the employed and the unemployed.

#### Employed (in Reference Week)

Refers to persons 15 years of age and over, excluding institutional residents, who, during the week (Sunday to Saturday) prior to Census Day (May 15, 2001):

- (a) did any work at all for pay or in self-employment or without pay in a family farm, business or professional practice;
- (b) were absent from their job or business, with or without pay, for the entire week because of a vacation, an illness, a labour dispute at their place of work, or any other reasons.

#### Unemployed (in Reference Week)

Refers to persons 15 years of age and over, excluding institutional residents, who, during the week (Sunday to Saturday) prior to Census Day (May 15, 2001), were without paid work or without self-employment work and were available for work and either:

- (a) had actively looked for paid work in the past four weeks; or
- (b) were on temporary lay-off and expected to return to their job; or
- (c) had definite arrangements to start a new job in four weeks or less.

#### Not in the Labour Force (in Reference Week)

Refers to persons 15 years of age and over, excluding institutional residents, who, in the week (Sunday to Saturday) prior to Census Day (May 15, 2001), were neither employed nor unemployed. It includes students, homemakers, retired workers, seasonal workers in an "off" season who were not looking for work, and persons who could not work because of a long-term illness or disability.

#### Labour Force (in Reference Week)

Refers to persons who were either employed or unemployed during the week (Sunday to Saturday) prior to Census Day (May 15, 2001).

In past censuses, this was called "Total Labour Force".

# Participation Rate (in Reference Week)

Refers to the labour force in the week (Sunday to Saturday) prior to Census Day (May 15, 2001), expressed as a percentage of the population 15 years of age and over excluding institutional residents.

The participation rate for a particular group (age, sex, marital status, geographic area, etc.) is the total labour force in that group, expressed as a percentage of the population 15 years of age and over, in that group.

#### **Employment Rate (in Reference Week)**

Refers to the number of persons employed in the week (Sunday to Saturday) prior to Census Day (May 15, 2001), expressed as a percentage of the total population 15 years of age and over excluding institutional residents.

The employment rate for a particular group (age, sex, marital status, geographic area, etc.) is the number of employed in that group, expressed as a percentage of the population 15 years of age and over in that group.

In past censuses, this was called the Employment-population Ratio.

#### Unemployment Rate (in Reference Week)

Refers to the unemployed expressed as a percentage of the labour force in the week (Sunday to Saturday) prior to Census Day (May 15, 2001).

The unemployment rate for a particular group (age, sex, marital status, geographic area, etc.) is the unemployed in that group, expressed as a percentage of the labour force in that group, in the week prior to enumeration.

#### Note:

See the *Dictionary of the 1971 Census terms* (Catalogue No. 12-540) for differences between 1961 and 1971.

#### Land Area

Land area is the area in square kilometres of the land-based portions of standard geographic areas.

The land area measurements are unofficial, and are provided for the sole purpose of calculating population density.

#### **Landed Immigrant Status**

Refers to people who have been granted the right to live in Canada permanently by immigration authorities.

# Language Used at Work

Refers to the language used most often at work by the individual at the time of the census. Other languages used at work on a regular basis are also collected.

#### **Legal Marital Status**

Refers to the legal conjugal status of a person.

The various responses are defined as follows:

**Never legally married (single)** – Persons who have never married (including all persons less than 15 years of age) and persons whose marriage has been annulled and who have not remarried.

**Legally married (and not separated)** – Persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained.

Separated, but still legally married – Persons currently married, but who are no longer living with their spouse (for any reason other than illness or work) and have not obtained a divorce.

**Divorced** – Persons who have obtained a legal divorce and who have not remarried.

**Widowed** – Persons who have lost their spouse through death and who have not remarried.

# Low Income Cut-offs (LICOs)

Measures of low income known as low income cut-offs (LICOs) were first introduced in Canada in 1968 based on 1961 Census income data and 1959 family expenditure patterns. At that time, expenditure patterns indicated that Canadian families spent about 50% of their total income on food, shelter and clothing. It was arbitrarily estimated that families spending 70% or more of their income (20 percentage points more than the average) on these basic necessities would be in "straitened" circumstances. With this assumption, low income cut-off points were set for five different sizes of families

Subsequent to these initial cut-offs, revised low income cut-offs were established based on national family expenditure data from 1969, 1978, 1986 and 1992. These data indicated that Canadian families spent, on average, 42% in 1969, 38.5% in 1978, 36.2% in 1986 and 34.7% in 1992 of their total income on basic necessities. Since 1992, data from the expenditure survey have indicated that this proportion has remained fairly stable. By adding the original difference of 20 percentage points to the basic level of expenditure on necessities, new low income cut-offs were set at income levels differentiated by family size and degree of urbanization. Since 1992, these cut-offs have been updated yearly by changes in the consumer price index.

#### Mode of Transportation

Refers to the mode of transportation to work of non-institutional residents 15 years of age and over who worked at some time since January 1, 2000. Persons who indicate in the place of work question that they either had no fixed workplace address, or specified a usual workplace address, are asked to identify the mode of transportation they most frequently use to commute from home to work. The variable usually relates to the individual's job in the week prior to enumeration. However, if the person did not work during that week but had worked at some time since January 1, 2000, the information relates to the job held longest during that period.

Persons who use more than one mode of transportation are asked to identify the single mode they use for most of the travel distance. As a result, the question provides data on the primary mode of transportation to work. The question does not measure multiple modes of transportation, nor does it measure the seasonal variation in mode of transportation or trips made for purposes other than the commute from home to work.

#### **Mother Tongue**

Refers to the first language learned at home in childhood and still understood by the individual at the time of the census.

#### **Non-immigrant Population**

Refers to people who are Canadian citizens by birth. Although most were born in Canada, a small number of them were born outside Canada to Canadian parents.

# Occupation (Based on the 2001 National Occupational Classification for Statistics [2001 NOC-S])

Refers to the kind of work persons were doing during the reference week, as determined by their kind of work and the description of the main activities in their job. If the person did not have a job during the week (Sunday to Saturday) prior to enumeration (May 15, 2001), the data relate to the job of longest duration since January 1, 2000. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

The 2001 occupation data are classified according to the 2001 National Occupational Classification for Statistics (2001 NOC–S). This classification is composed of four levels of aggregation. There are 10 broad occupational categories containing 47 major groups that are further subdivided into 140 minor groups. At the most detailed level, there are 520 occupation unit groups. Occupation unit groups are formed on the basis of the education, training, or skill level required to enter the job, as well as the kind of work performed, as determined by the tasks, duties and responsibilities of the occupation.

For information on the 2001 NOC-S, see the *National Occupational Classification for Statistics, 2001*, Catalogue No. 12-583-XPE.

# Owner's Major Payments or Gross Rent as a Percentage of Household Income

Refers to the proportion of average monthly 2000 total household income which is spent on owner's major payments (in the case of owner-occupied dwellings) or on gross rent (in the case of tenant-occupied dwellings). This concept is illustrated below:

# (a) Owner-occupied non-farm dwellings:

Owner's major payments X 100 = \_\_\_%

(2000 total annual household income) /12

## (b) Tenant-occupied non-farm dwellings:

Gross rent X 100 = \_\_\_%

(2000 total annual household income) /12

#### **Period of Construction**

Refers to the period in time during which the building or dwelling was originally constructed.

#### Period of Immigration

Refers to ranges of years based on the year of immigration question. Year of immigration refers to the year in which landed immigrant status was first obtained.

# Place of Birth of Respondent

Refers to specific provinces or territories for respondents who were born in Canada, or to specific countries if born outside Canada.

# Place of Residence 1 Year Ago (Mobility)

Refers to the relationship between a person's usual place of residence on Census Day and his or her usual place of residence one year earlier. A person is classified as a non-mover if no difference exists. Otherwise, a person is classified as a mover and this categorization is called Mobility Status (1 Year Ago). Within the category of movers, a further distinction is made between non-migrants and migrants; this difference is called migration status.

**Non-movers** are persons who, on Census Day, were living at the same address as the one at which they resided one year earlier.

**Movers** are persons who, on Census Day, were living at a different address than the one at which they resided one year earlier.

**Non-migrants** are movers who, on Census Day, were living at a different address, but in the same census subdivision (CSD) as the one they lived in one year earlier.

Migrants are movers who, on Census Day, were residing in a different CSD one year earlier (internal migrants) or who were living outside Canada one year earlier (external migrants).

**Intraprovincial migrants** are movers who, on Census Day, were living in a different census subdivision than the one at which they resided one year earlier, in the same province.

**Interprovincial migrants** are movers who, on Census Day, were living in a different census subdivision than the one at which they resided one year earlier, in a different province.

# Place of Residence 5 Years Ago (Mobility)

Refers to the relationship between a person's usual place of residence on Census Day and his or her usual place of residence five years earlier. A person is classified as a non-mover if no difference exists. Otherwise, a person is classified as a mover and this categorization is called Mobility Status (5 Years Ago). Within the movers category, a further distinction is made between non-migrants and migrants; this difference is called migration status.

**Non-movers** are persons who, on Census Day, were living at the same address as the one at which they resided five years earlier.

**Movers** are persons who, on Census Day, were living at a different address than the one at which they resided five years earlier.

Non-migrants are movers who, on Census Day, were living at a different address, but in the same census subdivision (CSD) as the one they lived in five years earlier.

Migrants are movers who, on Census Day, were residing in a different CSD five years earlier (internal migrants) or who were living outside Canada five years earlier (external migrants).

**Intraprovincial migrants** are movers who, on Census Day, were living in a different census subdivision than the one in which they resided five years earlier, in the same province.

Interprovincial migrants are movers who, on Census Day, were living in a different census subdivision than the one in which they resided five years earlier, in a different province.

#### Place of Work Status

Refers to the place of work of non-institutional residents 15 years of age and over who worked at some time since January 1, 2000. The variable usually relates to the individual's job held in the week prior to enumeration. However, if the person did not work during that week but had worked at some time since January 1, 2000, the information relates to the job held longest during that period.

**Worked at home** – Persons whose job is located in the same building as their place of residence, persons who live and work on the same farm, building superintendents and teleworkers who spend most of their work week working at home.

Worked outside Canada – Persons who work at a location outside Canada. This can include diplomats, Armed Forces personnel and other persons enumerated abroad. This category also includes recent immigrants who may not currently be employed, but whose job of longest duration since January 1, 2000 was held outside Canada.

No fixed workplace address – Persons who do not go from home to the same workplace location at the beginning of each shift. Such persons include building and landscape contractors, travelling salespersons, independent truck drivers, etc.

Worked at the address specified below – Persons who are not included in the categories described above and who report to the same (usual) workplace location at the beginning of each shift are included here. Respondents are asked to provide the street address, city, town, village, township, municipality or Indian reserve, province/territory and postal code of their workplace. If the full street address was not known, the name of the building or nearest street intersection could be substituted.

Teleworkers who spend less than one-half of their workweek working at their home office are asked to report the full address of their employer. Persons whose workplace location varied, but who reported regularly to an employer's address at the beginning of each shift, are asked to report the full address of the employer.

### **Population Universe**

The Population Universe of the 2001 Census includes the following groups:

- Canadian citizens (by birth or by naturalization) and landed immigrants with a usual place of residence in Canada:
- Canadian citizens (by birth or by naturalization) and landed immigrants who are abroad, either on a military base or attached to a diplomatic mission:
- Canadian citizens (by birth or by naturalization) and landed immigrants at sea or in port aboard merchant vessels under Canadian registry:
- persons with a usual place of residence in Canada who are claiming refugee status and members of their families living with them;
- persons with a usual place of residence in Canada who hold student authorizations (student visas or student permits) and members of their families living with them;
- persons with a usual place of residence in Canada who hold employment authorizations (or work permits) and members of their families living with them;
- persons with a usual place of residence in Canada who hold Minister's permits (including extensions) and members of their families living with them.

For census purposes, the last four groups in this list are referred to as "non-permanent residents".

#### Presence of Children

Refers to the number of children in private households by age groups.

# **Province or Territory**

Province and territory refer to the major political units of Canada. From a statistical point of view, province and territory are basic areas for which data are tabulated. Canada is divided into ten provinces and three territories.

#### Religion

Refers to specific religious denominations, groups or bodies, as well as to sects, cults, or other religiously defined communities or systems of belief.

#### Rent. Gross

Refers to the total average monthly payments paid by tenant households to secure shelter.

#### Rooms

Refers to the number of rooms in a dwelling. A room is an enclosed area within a dwelling which is finished and suitable for year-round living.

#### School Attendance

Refers to either full-time or part-time (day or evening) attendance at school, college or university during the ninemonth period between September 2000 and May 15, 2001. Attendance is counted only for courses which could be used as credits towards a certificate, diploma or degree.

#### Sex

Refers to the gender of the respondent.

# Structural Type of Dwelling

Refers to the structural characteristics and/or dwelling configuration, that is, whether the dwelling is a single-detached house, an apartment in a high-rise building, a row house, a mobile home, etc.

#### Tenure

Refers to whether some member of the household owns or rents the dwelling, or whether the dwelling is Band housing (on an Indian reserve or settlement).

#### Total Income

Refers to the total money income received from the following sources during calendar year 2000 by persons 15 years of age and over:

- wages and salaries (total);
- net farm income:
- net non-farm income from unincorporated business and/ or professional practice:
- Canada Child Tax Benefits:
- Old Age Security pension and Guaranteed Income Supplement<sup>1</sup>
- benefits from Canada or Quebec Pension Plan;
- benefits from Employment Insurance:
- other income from government sources;
- dividends, interest on bonds, deposits and savings certificates, and other investment income;
- retirement pensions, superannuation and annuities, including those from RRSPs and RRIFs;
- other money income.

Receipts Not Counted as Income – The income concept excluded gambling gains and losses, lottery prizes, money inherited during the year in a lump sum, capital gains or losses, receipts from the sale of property, income tax refunds, loan payments received, lump-sum settlements of insurance policies, rebates received on property taxes, refunds of pension contributions, as well as all income "in kind", such as free meals, living accommodations, or agricultural products produced and consumed on the farm.

Average Income of Individuals – Average income of individuals refers to the weighted mean total income of individuals 15 years of age and over who reported income for 2000. Average income is calculated from unrounded data by dividing the aggregate income of a specified group of individuals (e.g. males 45 to 54 years of age) by the number of individuals with income in that group.

Average and median incomes and standard errors for average income of individuals will be calculated for those individuals who are at least 15 years of age and who have an income (positive or negative). For all other universes (e.g. census families or private households), these statistics will be calculated over all units, whether or not they reported any income.

Median Income of Individuals – The median income of a specified group of income recipients is that amount which divides their income size distribution into two halves, i.e. the incomes of the first half of individuals are below the median, while those of the second half are above the median. Median income is calculated from the unrounded number of individuals (e.g. males 45 to 54 years of age) with income in that group.

Average and median incomes and standard errors for average income of individuals will be calculated for those individuals who are at least 15 years of age and who have an income (positive or negative). For all other universes (e.g. census families or private households), these statistics will be calculated over all units, whether or not they reported any income.

Standard Error of Average Income – Refers to the estimated standard error of average income for an income size distribution. If interpreted as shown below, it serves as a rough indicator of the precision of the corresponding estimate of average income. For about 68% of the samples which could be selected from the sample frame, the difference between the sample estimate of average income and the corresponding figure based on complete enumeration would be less than one standard error. For about 95% of the possible samples, the difference would be less than two standard errors and, in about 99% of the samples, the difference would be approximately two and one half standard errors.

#### **Unattached Individuals**

Refers to household members who are not members of an economic family. Persons living alone are included in this category.

#### Value of Dwelling

Refers to the dollar amount expected by the owner if the dwelling were to be sold.

#### **Visible Minorities**

Refers to the visible minority group to which the respondent belongs. The *Employment Equity Act* defines visible minorities as "persons, other than Aboriginal peoples, who are non-Caucasian in race or non-white in colour".

The visible minority population includes the following groups: Chinese, South Asian, Black, Filipino, Latin American, Southeast Asian, Arab, West Asian, Korean, Japanese, Visible Minority, n.i.e. and Multiple Visible Minorities.

# **Data Quality**

#### General

The 2001 Census was a large and complex undertaking and, while considerable effort was taken to ensure high standards throughout all collection and processing operations, the resulting estimates are inevitably subject to a certain degree of error. Users of census data should be aware that such error exists, and should have some appreciation of its main components, so that they can assess the usefulness of census data for their purposes and the risks involved in basing conclusions or decisions on these data.

Errors can arise at virtually every stage of the census process, from the preparation of materials through data processing, including the listing of dwellings and the collection of data. Some errors occur at random, and when the individual responses are aggregated for a sufficiently large group, such errors tend to cancel out. For errors of this nature, the larger the group, the more accurate the corresponding estimate. It is for this reason that users are advised to be cautious when using small estimates. There are some errors, however, which might occur more systematically, and which result in "biased" estimates. Because the bias from such errors is persistent no matter how large the group for which responses are aggregated, and because bias is particularly difficult to measure, systematic errors are a more serious problem for most data users than the random errors referred to previously.

For census data in general, the principal types of error are as follows:

- coverage errors, which occur when dwellings or individuals are missed, incorrectly enumerated or counted more than once;
- non-response errors, which result when responses cannot be obtained from a certain number of households and/or individuals, because of extended absence or some other reason;
- response errors, which occur when the respondent, or sometimes the Census Representative, misunderstands a census question, and records an incorrect response or simply uses the wrong response box;
- processing errors, which can occur at various steps including coding, when "write-in" responses are transformed into numerical codes; data capture, when responses are transferred from the census questionnaire in an electronic format, by key-entry operators; and imputation, when a "valid", but not necessarily correct, response is inserted into a record by the computer to replace missing or "invalid" data ("valid" and "invalid" referring to whether or not the response is consistent with other information on the record);
- sampling errors, which apply only to the supplementary questions on the "long form" asked of a one-fifth sample of households, and which arise from the fact that the responses to these questions, when weighted up to represent the whole population, inevitably differ somewhat from the responses which would have been obtained if these questions had been asked of all households.

The above types of error each have both random and systematic components. Usually, however, the systematic component of sampling error is very small in relation to its random component. For the other non sampling errors, both random and systematic components may be significant.

# **Coverage Errors**

Coverage errors affect the accuracy of the census counts, that is, the sizes of the various census universes: population, families, households and dwellings. While steps have been taken to correct certain identifiable errors, the final counts are still subject to some degree of error because persons or dwellings have been missed, incorrectly enumerated in the census or counted more than once.

Missed dwellings or persons result in **undercoverage**. Dwellings can be missed because of the misunderstanding of enumeration area (EA) boundaries, or because either they do not look like dwellings or they appear uninhabitable. Persons can be missed when their dwelling is missed or is classified as vacant, or because the respondent misinterprets the instructions on whom to include on the questionnaire. Some individuals may be missed because they have no usual residence and did not spend census night in a dwelling.

Dwellings or persons incorrectly enumerated or double counted result in overcoverage. Overcoverage of dwellings can occur when structures unfit for habitation are listed as dwellings (incorrectly enumerated), when there is a certain ambiguity regarding the EA boundaries or when units (for example, rooms) are listed separately instead of being treated as part of one dwelling (double counted). Persons can be counted more than once because their dwelling is double counted or because the guidelines on whom to include on the questionnaire have been misunderstood. Occasionally, someone who is not in the census population universe, such as a foreign resident or a fictitious person, may, incorrectly, be enumerated in the census. On average, overcoverage is less likely to occur than undercoverage and, as a result. counts of dwellings and persons are likely to be slightly underestimated.

For the 2001 Census, three studies are used to measure coverage error. In the Dwelling Classification Study, dwellings listed as vacant were revisited to verify that they were vacant on Census Day, and dwellings whose households were listed as non-respondent were revisited to determine the number of usual residents and their characteristics. Adjustments have been made to the final census counts for households and persons missed because their dwelling was incorrectly classified as vacant. The census counts may also have been adjusted for dwellings whose households were classified as non-respondent. Despite these adjustments, the final counts are still subject to some undercoverage. Undercoverage tends to be higher for certain segments of the population, such as young adults (especially young adult males) and recent immigrants. The Reverse Record Check Study is used to measure the residual undercoverage for Canada, and each province and territory. The Overcoverage Study is designed to investigate overcoverage errors. The results of the Reverse Record Check and the Overcoverage Study, when taken together, furnish an estimate of net undercoverage.

# Other Non-sampling Errors

While coverage errors affect the number of units in the various census universes, other errors affect the characteristics of those units

Sometimes it is not possible to obtain a complete response from a household, even though the dwelling was identified as occupied and a questionnaire was dropped off. The household members may have been away throughout the census period or, in rare instances, the householder may have refused to complete the form. More frequently, the questionnaire is returned but no response is provided to certain questions. Effort is devoted to ensure as complete a questionnaire as possible. Census representatives edit the questionnaires and follow up on missing information. Their work is then checked by a supervisor and a quality control technician. Despite this, at the end of the collection stage, a small number of responses are still missing, i.e. non-response errors. Although missing responses are eliminated during processing by replacing each one of them by the corresponding response for a "similar" record, there remain some potential imputation errors. This is particularly serious if the non-respondents differ in some respects from the respondents: this procedure will then introduce a non-response bias.

Even when a response is obtained, it may not be entirely accurate. The respondent may have misinterpreted the question or may have guessed the answer, especially when answering on behalf of another, possibly absent, household member. The respondent may also have entered the answer in the wrong place on the questionnaire. Such errors are referred to as **response errors**. While response errors usually arise from inaccurate information provided by respondents, they can also result from mistakes by the Census Representative who completed certain parts of the questionnaire, such as the structural type of dwelling, or who followed up to obtain a missing response.

Some of the census questions require a written response. During processing, these "write-in" entries are given a numeric code. Coding errors can occur when the written response is ambiguous, incomplete, difficult to read or when the code list is extensive (e.g. major field of study, place of work). A formal Quality Control (QC) operation is used to detect, rectify and reduce coding errors. Within each work unit, a sample of responses is independently coded a second time. The resolution of discrepancies between the first and second codings determines whether recoding of the work unit is necessary. Except for the Industry and Occupation variables, much of the census coding is now automated, resulting in a reduction of coding errors.

The information on the questionnaires is typed into a computer file. Two procedures are used to control the number of data capture errors. First, certain edits (such as range checks) are performed as the data are keyed in. Second, a sample from each batch of documents is retyped and compared with the original entries. Unsatisfactory work is identified and corrected, and the remainder of the batch is captured as needed.

Once captured, the data are edited where they undergo a series of computer checks to identify missing or inconsistent responses. These are replaced during the imputation stage of processing where either a response consistent with the other respondents' data is inferred or a response from a similar donor is substituted. Imputation ensures a complete database where the data correspond to the census counts and facilitate multivariate analyses. Although errors may have been introduced during **imputation**, the methods used have been rigorously tested to minimize systematic errors.

Various studies are being carried out to evaluate the quality of the responses obtained in the 2001 Census. For each question, non-response rates and edit failure rates have been calculated. These can be useful in identifying the potential for non-response errors and other types of errors. Also, tabulations from the 2001 Census have been or will be compared with corresponding estimates from previous censuses, from sample surveys (such as the Labour Force Survey) and from various administrative records (such as birth registrations and municipal assessment records). Such comparisons can indicate potential quality problems or at least discrepancies between the sources.

In addition to these aggregate-level comparisons, there are some micro-match studies in progress, in which census responses are compared with another source of information at the individual record level. For certain "stable" characteristics (such as age, sex, mother tongue and place of birth), the responses obtained in the 2001 Census, for a sample of individuals, are being compared with those for the same individuals in the 1996 Census.

# **Sampling Errors**

Estimates obtained by weighting up responses collected on a sample basis are subject to error due to the fact that the distribution of characteristics within the sample will not usually be identical to the distribution of characteristics within the population from which the sample has been selected.

The potential error introduced by sampling will vary according to the relative scarcity of the characteristics in the population. For large cell values, the potential error due to sampling, as a proportion of the cell value, will be relatively small. For small cell values, this potential error, as a proportion of the cell value, will be relatively large.

The potential error due to sampling is usually expressed in terms of the so-called "standard error". This is the square root of the average, taken over all possible samples of the same size and design, of the squared deviation of the sample estimate from the value for the total population.

The following table provides approximate measures of the standard error due to sampling. These measures are intended as a general guide only.

# Approximate Standard Error Due to Sampling for 2001 Census Sample Data

| Cell Value | Approximate<br>Standard Error |
|------------|-------------------------------|
| 50 or less | 15                            |
| 100        | 20                            |
| 200        | 30                            |
| 500        | 45                            |
| 1,000      | 65                            |
| 2,000      | 90                            |

|            |                               |

Users wishing to determine the approximate error due to sampling for any given cell of data, based upon the 20% sample, should choose the standard error value corresponding to the cell value that is closest to the value of the given cell in the census tabulation. When using the obtained standard error value, the user, in general, can be reasonably certain that, for the enumerated population, the true value (discounting all forms of error other than sampling) lies within plus or minus three times the standard error (e.g. for a cell value of 1,000, the range would be 1,000  $\pm$  [3  $\times$  65] or 1,000  $\pm$  195).

The standard errors given in the table above will not apply to population, household, dwelling or family counts for the geographic area under consideration (see Sampling and Weighting below). The effect of sampling for these cells can be determined by a comparison with a corresponding 100% data product.

The effect of the particular sample design and weighting procedure used in the 2001 Census will vary, however, from one characteristic to another and from one geographic area to another. The standard error values in the table may, therefore, understate or overstate the error due to sampling.

### Sampling and Weighting

The 2001 Census data were collected either from 100% of the households or on a sample basis (i.e. from a random sample of one in five households) with the data weighted up to provide estimates for the entire population. The information was collected on a 20% sample basis and weighted up to compensate for sampling. All table headings are noted accordingly. Note that, on Indian reserves and in remote areas, all data were collected on a 100% basis.

For any given geographic area, the weighted population, household, dwelling or family total or subtotal may differ from that shown in reports containing data collected on a 100% basis. Such variations are due to sampling and to the fact that, unlike sample data, 100% data do not exclude institutional residents.

# **Confidentiality and Random Rounding**

The figures shown in the tables have been subjected to a confidentiality procedure known as random rounding to prevent the possibility of associating statistical data with any identifiable individual. Under this method, all figures. including totals and margins, are randomly rounded either up or down to a multiple of "5", and in some cases "10". While providing strong protection against disclosure, this technique does not add significant error to the census data. The user should be aware that totals and margins are rounded independently of the cell data so that some differences between these and the sum of rounded cell data may exist. Also, minor differences can be expected in corresponding totals and cell values among various census tabulations. Similarly. percentages, which are calculated on rounded figures, do not necessarily add up to 100%. Order statistics (median, quartiles. percentiles, etc.) and measures of dispersion such as the standard error are computed in the usual manner. When a statistic is defined as the quotient of two numbers (which is the case for averages, percentages, and proportions), the two numbers are rounded before the division is performed. For income, owner's payments, value of dwelling, hours worked, weeks worked and age, the sum is defined as the product of the average and the rounded weighted frequency. Otherwise, it is the weighted sum that is rounded. It should also be noted that small cell counts may suffer a significant distortion as a result of random rounding. Individual data cells containing small numbers may lose their precision as a result. Also, a statistic is suppressed if the number of actual records used in the calculation is less than 4 or if the sum of the weight of these records is less than 10. In addition, for values expressed in dollar units, other rules are applied. For standard products, if all the values are the same, the statistic is suppressed. For all other products, the statistic is suppressed if the range of the values is too narrow or if all values are less than, in absolute value, to a specified threshold.

Users should be aware of possible data distortions when they are aggregating these rounded data. Imprecisions as a result of rounding tend to cancel each other out when data cells are re-aggregated. However, users can minimize these distortions by using, whenever possible, the appropriate subtotals when aggregating.

For those requiring maximum precision, the option exists to use custom tabulations. With custom products, aggregation is done using individual census database records. Random rounding occurs only after the data cells have been aggregated, thus minimizing any distortion.

In addition to random rounding, **area suppression** has been adopted to further protect the confidentiality of individual responses.

**Area suppression** is the deletion of all characteristic data for geographic areas with populations below a specified size. The extent to which data are suppressed depends upon the following factors:

- If the data are tabulated from the 100% database, they are suppressed if the total population in the area is less than 40.
- If the data are tabulated from the 20% sample database, they are suppressed if the total non-institutional population in the area from either the 100% or 20% database is less than 40.

There are some exceptions to these rules:

- Income distributions and related statistics are suppressed if the population in the area, excluding institutional residents, is less than 250 from either the 100% or the 20% database, or if the number of private households is less than 40 from the 20% database.
- Place-of-work distributions and related statistics are suppressed if the total number of employed persons in the area is less than 40, according to the sample database. If the data also include an income distribution, the threshold is raised to 250, again according to the sample database.
- Tabulations covering both place of work and place of residence along with related statistics are suppressed, if the total number of employed persons in the area is less than 40 according to the sample database, or if the area's total population, excluding institutional residents, according to either the 100% or the sample database, is less than 40. If the tabulations also include an income distribution, the threshold is raised to 250 in all cases and the tabulations are suppressed if the number of private dwellings in the place of residence area is less than 40.
- Same-sex couples distributions and related statistics are suppressed if the population in private households in the area is less than 5,000, according to the 20% sample database.
- If the data are tabulated from the 100% database and refer to six-character postal codes or to groups of either blocks or block-faces, they are suppressed if the total population in the area is less than 100.
- If the data are tabulated from the 20% sample database and refer to six-character postal codes or to groups of either blocks or block-faces, they are suppressed if the total non-institutional population in the area from either the 100% or 20% database is less than 100.
- If the data refer to groups of either blocks or block-faces, and cover place of work, they are suppressed if the total number of employed persons in the area is less than 100, according to the sample database.
- If the data refer to groups of either blocks or block-faces, and cover both place of work and place of residence, they are suppressed if the total number of employed persons in the area is less than 100, according to the sample database, or if the area's total population, excluding institutional residents, according to either 100% or the sample database, is less than 100.

In all cases, suppressed data are included in the appropriate higher aggregate subtotals and totals.

The suppression technique is being implemented for all products involving subprovincial data (i.e. Profile series, basic cross-tabulations, semi-custom and custom data products) collected on a 100% or 20% sample basis.

For further information on the quality of census data, contact the Social Survey Methods Division at Statistics Canada, Ottawa, Ontario, Canada K1A 0T6, or by calling (613) 951-4783.

# **Special Notes**

# **Aboriginal Identity**

Users should be aware that the population counts associated with this variable are more affected than most by the incomplete enumeration of certain Indian reserves and Indian settlements. The extent of the impact will depend on the geographical area under study. In 2001, a total of 30 Indian reserves and Indian settlements were incompletely enumerated by the census. The population of these 30 communities are not included in the census counts.

# Changes to Family Concepts for the 2001 Census

For the 1996 Census, the definition of census family was as follows:

Refers to a now-married couple (with or without nevermarried sons and/or daughters of either or both spouses), a couple living common-law (with or without never-married sons and/or daughters of either or both partners) or a loneparent of any marital status, with at least one never-married son or daughter living in the same dwelling.

This reflected a concept that had not changed since 1976. However, during the planning for the 2001 Census, it was decided that some changes were required, due to the following factors: (1) changes to federal and provincial legislation putting same-sex couples on an equal footing with opposite-sex common-law couples (most notably Bill C-23, the *Modernization of Benefits and Obligations Act*, which was passed by the Government of Canada in 2000); (2) recommendations by the United Nations as part of a process of standardization of concepts for the 2000-2001 round of censuses in member countries; and (3) a significant number of persons less than 15 years of age classified as "non-family persons" in previous censuses.

As a result, the census family concept for the 2001 Census reflects the following changes:

- Two persons living in a same-sex common-law relationship, along with any of their children residing in the household, are considered a census family.
- Children in a census family can have been previously married (as long as they are not currently living with a spouse or common-law partner). Previously, they had to be "never-married".

- A grandchild living in a three-generation household where the parent (middle generation) is never-married is, contrary to previous censuses, now considered as a child in the census family of his or her parent, provided the grandchild is not living with his or her own spouse, common-law partner, or child. Traditionally, the census family usually consisted of the two older generations.
- A grandchild of another household member, where a middle-generation parent is not present, is now considered as a child in the census family of his or her grandparent, provided the grandchild is not living with his or her own spouse, common-law partner, or child. Traditionally, such a grandchild would not be considered as a member of a census family.

The last three changes listed (definition of "child"), together, result in a 1.5% increase in the total number of census families, and in a 10.1% increase in the number of lone-parent families. The inclusion of same-sex couples results in a 0.4% increase in the number of census families at the national level.

The term economic family refers to a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage, common-law or adoption. This definition has not changed for 2001. The only effect of conceptual changes on economic families is that same-sex partners are now considered to be common-law partners. Thus they are considered related and members of the same economic family.

Outside of the "family universe", there are two related concepts that are affected by the change in the census family definition: common-law status and household type. Prior to 2001, two people living together as husband and wife without being legally married to each other were considered to be living common-law. For 2001, this has been expanded to include persons living in a same-sex partnership. The concept of household type refers to the basic division of private households into family and non-family households. Since it is based on the census family concept, the household type (whether a household is "family" or "non-family") is affected by the change. Also, the detailed classification of this variable is affected, since married couples and common-law couples were broken down into those "without never-married sons or daughters" and "with never-married sons or daughters". For 2001 this reads "without children" and "with children", with the attendant change in meaning.

# Comparability of 2001 Place of Work Data

Working at home can be measured in different ways. In the census, the "Worked at home" category includes persons who live and work at the same physical location, such as farmers, teleworkers and work camp workers. In addition, the 2001 Census Guide instructed persons who worked part of the time at home and part of the time at an employer's address to indicate that they "Worked at home" if most of their time was spent working at home (e.g. three days out of five).

Other Statistics Canada surveys such as the General Social Survey, the Survey of Labour and Income Dynamics, and the Workplace and Employee Survey also collect information on working at home. However, the survey data are not directly comparable to the census data since the surveys ask respondents whether they did some or all of their paid work at home, whereas the census asks them where they usually worked most of the time. Consequently, census estimates on work at home are lower than survey estimates.

The place-of-work question has remained in virtually the same format in each census since 1971. However, in 1996, the category "No fixed workplace address" replaced "No usual place of work". In 1996, the census questionnaire was modified by adding a check box for the "No fixed workplace" response category. In previous censuses, respondents were asked to write "No usual place of work" in the address fields. It is believed that previous censuses have undercounted the number of persons with "No fixed workplace address".

Annexations, incorporations and amalgamations of municipalities could create some difficulties when comparing spatial units and structures which change over time.

# **Data Quality for School Attendance**

The overall quality of the education variables from the 2001 Census is acceptable. However, users of the 2001 Census data on school attendance are cautioned that the counts for the 15 to 19 year olds not attending school category may be too high. The proportion of persons aged 15 to 19 who indicated they had not attended school in the school year prior to the census increased from 18% in 1996 to 23% in 2001. This variable requires further research.

# Data Quality – Relationship of Census Income Estimates to the National Accounts and Survey of Labour and Income Dynamics

Census income estimates of aggregate income in 2000 were compared to similar personal income estimates from the national accounts. After adjustments to the personal income estimates for differences in concepts and coverage, the census estimate of aggregate income in 2000 from comparable sources was 4.1% lower than the national accounts estimate. As in the past, census estimates for some income components and for some provinces compared more favourably than for others.

Census estimates of aggregate wages and salaries, the largest component of income, were almost identical to the national accounts estimates. Although there was a large difference between the two estimates of net income from farm self-employment (the smallest component of individual earnings), census estimates of aggregate income from both farm and non-farm self-employment were lower by 1%. Overall, estimates of total income from employment were nearly identical.

Census estimates of Old Age Security pensions and the Guaranteed Income Supplement were about 5% higher, while those for Canada/Quebec Pension Plan benefits were about 9% lower, than adjusted national accounts estimates. Employment Insurance benefits reported in the census were smaller by about 6%. Estimates of aggregate Canada Child

Tax benefits were nearly identical in both estimates. Census estimates of other government transfer payments, which include such items as social welfare benefits, provincial income supplements to seniors, veterans' pensions and GST/HST/QST refunds, were significantly below the estimates from the national accounts. Overall, census estimates of aggregate income from all government transfer payments were lower by about 13%. As in previous census-year comparisons, the census estimate of investment income was significantly lower, by 32% in 2000, than the national accounts estimate.

Census income statistics were also compared with similar statistics from the annual Survey of Labour and Income Dynamics (SLID). SLID estimates reflect adjustments made for population undercoverage, while census estimates do not include such an adjustment. This adjustment contributes to census estimates showing fewer income recipients (by 3.4%) and earners (by 7.2%) than SLID estimates. Consequently, census estimates of aggregate earnings are 4% lower than the SLID estimate, while the census estimate of aggregate total income of individuals is lower by 3%. Most of the observed provincial differences were considered acceptable in the light of sampling errors in the Survey.

#### Immigration and Citizenship Data

Persons living on Indian reserves and Indian settlements, who were enumerated with the 2001 Census Form 2D questionnaire, were not asked the citizenship and immigration questions. Consequently, data are not shown for Indian reserves and Indian settlements at the lower geographic levels. These data, however, are included in the totals for larger geographic areas, such as census divisions and provinces.

#### Impact of Municipal Restructuring

The boundaries and names of municipalities (census subdivisions) can change from one census to the next because of annexations, dissolutions and incorporations. However, since the 1996 Census, the changes are more numerous and more dramatic, especially in the provinces of Quebec, Ontario and British Columbia. In general, data from the 2001 Census are available for fewer and larger census subdivisions, and historical analyses are more complex. To bridge the impact of these municipal changes on data dissemination, the 2001 Census is producing a profile for dissolved census subdivisions.

#### Income Reference Period

Canadian censuses were conducted in 1996 and 2001. Income data from these censuses relate to the calendar year prior to the census year, i.e. 1995 and 2000 respectively.

# Income Suppression

Area suppression is the deletion of all characteristic data for geographic areas with populations below a specified size. Income distributions and related statistics are suppressed if the population in the area, excluding institutional residents, is less than 250 from either the 100% or the 20% database, or if the number of private households is less than 40 from the 20% database.

# Migration Data for Small Geographic Areas

Estimates of internal migration may be less accurate for small geographic areas, areas with a place name which is duplicated elsewhere, and for some Census Subdivisions (CSD) where previous residents may have provided the name of the Census Metropolitan Area or Census Agglomeration instead of the specific name of the component CSD from which they migrated.

# **Non-permanent Residents**

In 1991, 1996 and 2001, the Census of Population enumerated both permanent and non-permanent residents of Canada. Non-permanent residents are persons who held a student or employment authorization, Minister's permit, or who were refugee claimants, at the time of the census. Family members living with these persons are also classified as non-permanent residents.

Prior to 1991, only permanent residents of Canada were included in the census. (The only exception to this occurred in 1941.) Non-permanent residents were considered foreign residents and were not enumerated.

Today in Canada, non-permanent residents make up a significant segment of the population, especially in several census metropolitan areas. Their presence can affect the demand for such government services as health care, schooling, employment programs and language training. The inclusion of non-permanent residents in the census facilitates comparisons with provincial and territorial statistics (marriages, divorces, births and deaths) which include this population. In addition, this inclusion of non-permanent residents brings Canadian practice closer to the UN recommendation that long-term residents (persons living in a country for one year or longer) be enumerated in the census.

According to the 1996 Census, there were 166,715 non-permanent residents in Canada, representing 0.6% of the total population. There were slightly more non-permanent residents in Canada at the time of the 2001 Census: 198,645 non-permanent residents, or 0.7% of the total population.

Total population counts, as well as counts for all variables, are affected by this change in the census universe. Users should be especially careful when comparing data from 1991, 1996 or 2001 with data from previous censuses in geographic areas where there is a concentration of non-permanent residents. Such areas include the major metropolitan areas in Ontario, Quebec and British Columbia.

Although every attempt has been made to enumerate nonpermanent residents, factors such as language difficulties, the reluctance to complete a government form or to understand the need to participate may have affected the enumeration of this population.

#### Nunavut

Data from the 2001 Census are available for Nunavut, the new territory that came into effect on April 1, 1999.

Standard data products released only at the Canada/ Province/Territory geographic levels will not contain data for Nunavut for the census years prior to 2001. Standard data products released at the Census Metropolitan Area (CMA) and Census Agglomeration (CA) geographic levels will contain data for Nunavut for the 2001, 1996 and/or 1991 Censuses

The 1996 and 1991 CMA/CA data have been adjusted to reflect as closely as possible the 2001 CMA/CA geographic boundaries. This has been done to facilitate data comparisons using the 2001 geographic boundaries.

#### **Ontario Census Tracts**

A database error affected the presentation of the 1996 population counts for two census tracts (CTs), namely CTs 0520.05 and 0520.06, in the Census Metropolitan Area (CMA) of Toronto. The data for these CTs are correct but inverted: 0520.05 contains the data for 0520.06, and 0520.06 contains the data for 0520.05. Because of operational constraints, it was not possible to make adjustments to the 1996 database (adjusted counts) for these two CTs. Care should therefore be exercised when using these data.

# Population 15 Years and Over Who Worked Since 2000

Refers to those who have worked since January 1, 2000, regardless of whether or not they were in the labour force in the reference week.

# **Population and Dwelling Count Amendments**

After the release of the population and dwelling counts, errors are occasionally uncovered in the data. It is not possible to make changes to the 2001 Census data presented in these tables. Users can, however, obtain the population and dwelling count amendments listed by census subdivisions and other levels of geography by visiting the 2001 Census portion of the Statistics Canada Web site at www.statcan.ca. In addition, users can contact the nearest Statistics Canada regional reference centre by telephone at 1 800 263-1136 or by e-mail at infostats@statcan.ca.

#### **Population Counts**

The 2001 Census population counts for a particular area represent the number of Canadians whose usual place of residence is in that area, regardless of where they happened to be on Census Day. Also included are any Canadians who were staying in that area on Census Day and who had no usual place of residence elsewhere in Canada, as well as those considered to be "non-permanent residents" (see the Special Notes). For most areas, there is little difference between the number of usual residents and the number of people staying in the area on Census Day. For certain places, however, such as tourist or vacation areas, or those including large work camps, the number of people staying in that area at any particular time could significantly exceed the number of usual residents shown here. The population counts include Canadians living in other countries, but do not include foreign residents living in Canada (the "foreign residents" category does not include "non-permanent residents" - see the Special Notes). Given these differences, users are advised not to interpret population counts as being the number of people living in the reported dwellings.

# Structural Type of Dwelling

The 2001 Census collected data for two new categories for structural type of dwelling:

Apartment with direct ground access in a building that has fewer than five storeys; and Apartment without direct ground access in a building that has fewer than five storeys.

Postcensal data evaluation has revealed a serious misclassification problem with these dwellings. As a result, the data will not be released.

Data for "Apartment in a building that has fewer than five storeys" have been released in 2001 products. This category is an aggregate of the two new previously mentioned categories, and is directly comparable with the same category from previous censuses. It presents no data problems.

# Appendix 1. Incompletely Enumerated Indian Reserves and Indian Settlements, 1996 and 1991 Population Counts

| Province        |  | Population |      |  |
|-----------------|--|------------|------|--|
|                 | Incompletely enumerated Indian reserves and Indian settlements, 2001                                 |            | 1991 |  |

For more information on the 2001 suppression rules, please see the Data Quality section in the Reference Material of this publication.

For population characteristics of these suppressed Census Subdivisions, please see "A National Overview, Population and Dwelling Counts" (Cat. No. 93-360-XPB).

# **Regional Reference Centres**

The Advisory Services Division of Statistics Canada provides an information dissemination network across the country through eight regional reference centres. Each reference centre has a collection of current publications and reference documents that can be consulted or purchased, along with diskettes, CD-ROMs, maps, and other products. Copying facilities for printed materials are available on site

Each reference centre provides a wide range of additional services. Advisory Services can provide assistance in helping you identify your informational needs, establish sources of available data, consolidate and integrate data from different sources, develop profiles, provide analysis of highlights or tendencies and, finally, provide training on products, services, Statistics Canada concepts and the use of statistical data.

For more information, call the National Toll-free Enquiries Line listed below or send an e-mail to infostats@statcan.ca.

#### Contact Us

National Toll-free **Enquiries** Line (Canada and United States): 1 800 263-1136

TTY: 1 800 363-7629

Toll-free **Order Only** Line (Canada and United States): 1 800 267-6677

National Toll-free **Fax Order** Line (Canada and United States): 1 877 287-4369

E-mail: infostats@statcan.ca

# **Atlantic Region**

Serving the provinces of Newfoundland and Labrador, Nova Scotia, Prince Edward Island and New Brunswick.

Advisory Services Statistics Canada 2nd Floor, Box 11 1741 Brunswick Street Halifax, Nova Scotia B3J 3X8

Toll-free number: 1 800 263-1136 Local calls: (902) 426-5331 Fax number: (902) 426-9538 F-mail: infostats@statcan.ca

#### Quebec Region

Serving the province of Quebec and the territory of Nunavut except the National Capital Region.

Advisory Services Statistics Canada 4th Floor, East Tower Guy Favreau Complex 200 René Lévesque Blvd. W Montréal, Quebec H2Z 1X4

Toll-free number: 1 800 263-1136 Local calls: (514) 283-5725 Fax number: (514) 283-9350 E-mail: infostats@statcan.ca

# **National Capital Region**

Serving the National Capital Region.

Statistical Reference Centre (National Capital Region) Statistics Canada Main Building, Room 1500 120 Parkdale Avenue Ottawa, Ontario

Toll-free number: 1 800 263-1136 Local calls: (613) 951-8116 Fax number: (613) 951-0581 F-mail: infostats@statcan.ca

# **Ontario Region**

Serving the province of Ontario except the National Capital Region.

Advisory Services Statistics Canada Arthur Meighen Building, 10th Floor 25 St. Clair Avenue E Toronto, Ontario

Toll-free number: 1 800 263-1136 Local calls: (416) 973-6586 Fax number: (416) 973-7475 F-mail: infostats@statcan.ca

#### **Prairie Region**

This region has three reference centres serving the provinces of Manitoba, Saskatchewan, Alberta and the Northwest Territories.

Serving the province of Manitoba:

Advisory Services Statistics Canada Via Rail Building, Suite 200 123 Main Street Winnipeg, Manitoba R3C 4V9

Toll-free number: 1 800 263-1136 Local calls: (204) 983-4020 Fax number: (204) 983-7543 E-mail: infostats@statcan.ca

### Prairie Region - concluded

Serving the province of Saskatchewan:

Advisory Services Statistics Canada Park Plaza, Suite 440 2365 Albert Street Regina, Saskatchewan S4P 4K1

Toll-free number: 1 800 263-1136 Local calls: (306) 780-5405 Fax number: (306) 780-5403 E-mail: infostats@statcan.ca

Serving Alberta and the Northwest Territories:

Advisory Services Statistics Canada Pacific Plaza, Suite 900 10909 Jasper Avenue NW Edmonton, Alberta T5.I 4.I3

Toll-free number: 1 800 263-1136 Local calls: (780) 495-3027 Fax number: (780) 495-5318 E-mail: infostats@statcan.ca

#### **Pacific Region**

Serving the province of British Columbia and the Yukon Territory.

Advisory Services Statistics Canada Library Square Tower 600-300 West Georgia Street Vancouver, British Columbia V6B 6C7

Toll-free number: 1 800 263-1136 Local calls: (604) 666-3691 Fax number: (604) 666-4863 E-mail: infostats@statcan.ca

# **Définitions**

Pour de plus amples renseignements sur les définitions et les notes spéciales, veuillez consultez le Dictionnaire du recensement de 2001, n° 92-378-XIF ou 92-378-XPF au catalogue.

# Activité (pendant la semaine de référence)

Activité sur le marché du travail des personnes âgées de 15 ans et plus au cours de la semaine (du dimanche au samedi) ayant précédé le jour du recensement (le 15 mai 2001). Les recensés sont classés dans les catégories « Personnes occupées », « Chômeurs » ou « Inactifs ». La population active comprend les personnes occupées et les chômeurs.

# Personnes occupées (pendant la semaine de référence)

Personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui, au cours de la semaine (du dimanche au samedi) ayant précédé le jour du recensement (le 15 mai 2001):

- a) avaient fait un travail quelconque à un emploi salarié ou à leur compte ou sans rémunération dans une ferme ou une entreprise familiale ou dans l'exercice d'une profession;
- étaient temporairement absentes de leur travail ou de l'entreprise, avec ou sans rémunération, toute la semaine à cause de vacances, d'une maladie, d'un conflit de travail à leur lieu de travail, ou encore pour d'autres raisons.

#### Chômeurs (pendant la semaine de référence)

Personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui, pendant la semaine (du dimanche au samedi) ayant précédé le jour du recensement (le 15 mai 2001), étaient sans emploi salarié et sans travail à leur compte, étaient prêtes à travailler et :

- a) avaient activement cherché un emploi salarié au cours des quatre semaines précédentes; ou
- b) avaient été mises à pied mais prévoyaient reprendre leur emploi; ou
- avaient pris des arrangements définis en vue de se présenter à un nouvel emploi dans les quatre semaines suivantes.

#### Inactifs (pendant la semaine de référence)

Personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui, pendant la semaine (du dimanche au samedi) ayant précédé le jour du recensement (le 15 mai 2001), n'étaient ni occupées ni en chômage. Les inactifs comprennent les étudiants, les personnes au foyer, les retraités, les travailleurs saisonniers en période de relâche qui ne cherchaient pas un travail et les personnes qui ne pouvaient travailler en raison d'une maladie chronique ou d'une incapacité à long terme.

Population active (pendant la semaine de référence) Personnes qui étaient soit occupées, soit en chômage pendant la semaine (du dimanche au samedi) ayant précédé le jour du recensement (le 15 mai 2001).

Au cours des recensements précédents, cette variable était appelée « Population active totale ».

# Taux d'activité (pendant la semaine de référence)

Pourcentage de la population active pendant la semaine (du dimanche au samedi) ayant précédé le jour du recensement (le 15 mai 2001) par rapport aux personnes âgées de 15 ans et plus à l'exclusion des pensionnaires d'un établissement institutionnel.

Le taux d'activité d'un groupe donné (âge, sexe, état matrimonial, région géographique, etc.) correspond au nombre total d'actifs dans ce groupe, exprimé en pourcentage des personnes âgées de 15 ans et plus, de ce groupe.

### Taux d'emploi (pendant la semaine de référence)

Pourcentage de la population occupée au cours de la semaine (du dimanche au samedi) ayant précédé le jour du recensement (le 15 mai 2001), par rapport au pourcentage de la population de 15 ans et plus à l'exclusion des pensionnaires d'un établissement institutionnel.

Le taux d'emploi pour un groupe donné (âge, sexe, état matrimonial, région géographique, etc.) correspond au nombre de personnes occupées dans ce groupe, exprimé en pourcentage des personnes âgées de 15 ans et plus, de ce groupe.

Au cours des recensements antérieurs, cette variable était appelée « Rapport emploi-population ».

Taux de chômage (pendant la semaine de référence) Pourcentage de la population en chômage par rapport à la population active pendant la semaine (du dimanche au samedi) ayant précédé le jour du recensement (le 15 mai 2001).

Le taux de chômage d'un groupe donné (âge, sexe, état matrimonial, région géographique, etc.) correspond au nombre de chômeurs dans ce groupe exprimé en pourcentage de la population active dans ce groupe pendant la semaine ayant précédé le recensement.

#### Nota

Consultez le *Dictionnaire des termes du recensement de 1971* (n° 12-540 au catalogue) pour connaître les différences entre les données de 1961 et celles de 1971.

# Âge

Âge au dernier anniversaire de naissance (à la date de rétérence du recensement, soit le 15 mai 2001). Cette variable est établie d'après la réponse à la question sur la date de naissance.

# Âge à l'immigration

Âge du recensé lorsqu'il a obtenu pour la première fois le statut d'immigrant reçu. Un immigrant reçu est une personne à qui les autorités de l'immigration ont accordé le droit de résider au Canada en permanence.

# Agglomération de recensement (AR)

Se reporter à la définition de Région métropolitaine de recensement (RMR) et agglomération de recensement (AR).

# Catégorie de lieu de travail

Lieu de travail des personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui ont travaillé depuis le 1° janvier 2000. La variable se rapporte habituellement à l'emploi occupé par les recensés au cours de la semaine ayant précédé le recensement. Toutefois, dans le cas des personnes qui n'ont pas travaillé cette semaine-là, mais qui avaient travaillé à un moment quelconque depuis le 1° janvier 2000, les données portent sur l'emploi occupé le plus longtemps au cours de cette période.

À domicile – Les personnes dont le lieu de travail et la résidence se trouvaient dans le même immeuble, celles qui habitaient la ferme où elles travaillaient, les concierges d'immeuble et les télétravailleurs qui travaillaient à domicile pendant la plus grande partie de leur semaine de travail.

En dehors du Canada – Personnes dont le lieu de travail est à l'extérieur du Canada. Les diplomates, les membres des Forces armées et les autres personnes dénombrées à l'étranger, de même que les nouveaux immigrants ne travaillant pas en ce moment, mais dont l'emploi de plus longue durée depuis le 1er janvier 2000 avait été exercé à l'extérieur du Canada.

Sans adresse de travail fixe – Les personnes qui ne se rendaient pas au même lieu de travail au début de chaque quart, notamment les entrepreneurs en bâtiments, les entrepreneurs paysagistes, les représentants de commerce, les chauffeurs de camion indépendants, etc.

À l'adresse précisée ci-dessous – Les personnes qui ne sont pas incluses dans les catégories ci-dessus et qui se rendent au même lieu de travail (habituel) au début de chaque quart sont incluses ici. Les recensés devaient inscrire le numéro de voirie, la ville, le village, le canton, la municipalité ou la réserve indienne, la province ou le territoire et le code postal de leur lieu de travail. Ceux qui ne connaissaient pas l'adresse complète pouvaient donner uniquement le nom de l'immeuble ou de l'intersection la plus proche.

Les télétravailleurs qui passaient moins que la moitié de la semaine de travail à leur bureau à domicile devaient donner l'adresse complète de leur employeur. Les personnes qui travaillaient à des endroits différents, mais se présentaient à un siège social au début de chaque quart devaient donner l'adresse complète du siège social.

### Catégorie de revenu

Situation de la famille économique ou de la personne hors famille économique de 15 ans et plus par rapport aux seuils de faible revenu (SFR) de Statistique Canada.

# Catégorie de travailleurs

Variable permettant de classer les personnes qui ont déclaré un emploi selon les catégories suivantes :

- a) personnes qui ont travaillé principalement pour un salaire, pour un traitement, à commission, pour des pourboires, à la pièce ou contre rémunération « en nature » (paiements sous forme de biens ou de services, plufôt qu'en espèces);
- b) personnes qui ont travaillé surtout à leur compte, avec ou sans aide rémunérée dans une entreprise, une ferme ou à exercer une profession, seules ou avec des associés:
- c) personnes qui ont travaillé sans rémunération à exercer une profession ou dans une entreprise ou une ferme familiale appartenant à un parent du même ménage ou exploitée par celui-ci; le travail familial non rémunéré ne comprend pas les travaux ménagers non rémunérés, les soins aux enfants non rémunérés, les soins ou l'aide aux personnes âgées non rémunérés, ni le travail bénévole.

L'emploi déclaré désigne l'emploi que la personne occupait au cours de la semaine (du dimanche au samedi) ayant précédé le recensement (le 15 mai 2001) si elle avait travaillé, l'emploi qu'elle a occupé le plus longtemps depuis le 1ºr janvier 2000, si la personne n'avait pas travaillé au cours de la semaine de référence. Les personnes ayant occupé deux emplois ou plus cette semaine-là devaient donner des renseignements sur celui auquel elles avaient consacré le plus grand nombre d'heures.

# Chambres à coucher

Pièces conçues et meublées pour servir de chambres à coucher et utilisées principalement pour y dormir, même si ce n'est qu'à l'occasion (une chambre d'ami par exemple).

#### Citovenneté

Statut légal de citoyenneté du recensé. Les personnes ayant plus d'une citoyenneté devaient indiquer le nom du ou des autres pays dont ils étaient citoyens.

# Connaissance des langues non officielles

Indique les langues autres que le français ou l'anglais dans lesquelles le recensé peut soutenir une conversation.

#### Connaissance des langues officielles

Indique si le recensé peut soutenir une conversation en français seulement, en anglais seulement, en français et en anglais, ou dans aucune des deux langues officielles du Canada.

# Division de recensement (DR)

Division de recensement (DR) est le terme général de régions créées en vertu des lois provinciales (comme les comtés, les municipalités régionales de comté et les regional districts) ou d'autres genres de régions. Les divisions de recensement sont des régions géographiques intermédiaires entre la municipalité (subdivision de recensement) et la province.

# État du logement

Variable indiquant si, selon le répondant, le logement nécessite des réparations (à l'exception des rénovations ou ajouts souhaités).

# État matrimonial légal

Situation conjugale légale d'une personne.

Voici la définition des diverses catégories de réponse :

Jamais légalement marié (célibataire) – Personne qui n'a jamais été mariée (y compris toute personne de moins de 15 ans) ou personne dont le mariage a été annulé et qui ne s'est pas remariée.

Légalement marié (et non séparé) – Personne mariée dont le conjoint est vivant, à moins que le couple ne soit séparé ou divorcé.

Séparé, mais toujours légalement marié – Personne actuellement mariée, mais qui ne vit plus avec son conjoint (pour quelque raison que ce soit autre que la maladie ou le travail) et qui n'a pas obtenu de divorce.

**Divorcé** – Personne qui a obtenu un divorce et qui ne s'est pas remariée.

Veuf ou veuve – Personne dont le conjoint est décédé et qui ne s'est pas remariée.

#### Famille de recensement

Couple marié (avec ou sans enfants des deux conjoints ou de l'un d'eux), couple vivant en union libre (avec ou sans enfants des deux partenaires ou de l'un d'eux) ou parent seul (peu importe son état matrimonial) demeurant avec au moins un enfant dans le même logement. Un couple vivant en union libre peut être de sexe opposé ou de même sexe. Les « enfants » dans une famille de recensement incluent les petits-enfants vivant dans le même ménage que leurs grands-parents, en l'absence des parents.

# Famille économique

Groupe de deux personnes ou plus qui vivent dans le même logement et qui sont apparentées par le sang, par alliance, par union libre ou par adoption.

# Fréquence des unités à faible revenu

Proportion ou pourcentage de familles économiques ou de personnes hors famille économique dans une catégorie donnée dont le revenu est inférieur aux seuils de faible revenu. Ces taux de fréquence sont calculés d'après des estimations non arrondies des familles économiques et des personnes hors famille économique âgées de 15 ans et plus.

#### Fréquentation scolaire

Fréquentation à plein temps ou à temps partiel (le jour ou le soir) d'une école, d'un collège ou d'une université au cours de la période de neuf mois allant de septembre 2000 au 15 mai 2001. La fréquentation est comptée seulement pour les cours permettant d'accumuler des crédits en vue de l'obtention d'un certificat, d'un diplôme ou d'un grade.

#### Genre de ménage

Répartition fondamentale des ménages privés en ménages familiaux et en ménages non familiaux. Un ménage familial est un ménage qui comprend au moins une famille de recensement, c'est-à-dire un couple marié avec ou sans enfants, ou un couple vivant en union libre avec ou sans enfants, ou un parent seul avec un ou plusieurs enfants (famille monoparentale). Un ménage unifamilial se compose d'une seule famille de recensement (avec ou sans autres personnes hors famille) qui occupe un logement privé. Un ménage multifamilial se compose de deux familles de recensement ou plus (avec ou sans autres personnes hors famille de recensement) qui occupent le même logement privé.

Un ménage non familial est constitué soit d'une personne vivant seule dans un logement privé, soit d'un groupe de deux personnes ou plus qui partagent un logement privé, mais qui ne forment pas une famille de recensement.

#### Genre de subdivision de recensement

Les subdivisions de recensement (SDR) sont classées en 46 genres, selon les appellations officielles adoptées par les autorités provinciales ou fédérales. Il y a toutefois deux exceptions, soit la *Subdivision of Unorganized* à Terre-Neuve-et-Labrador et la *Subdivision of County Municipality* en Nouvelle-Écosse, qui constituent des régions géographiques équivalant aux municipalités et qui ont été créées par Statistique Canada et ces provinces pour la diffusion de données statistiques.

Afin de mieux distinguer les SDR les unes des autres, le nom de chaque subdivision de recensement est généralement accompagné d'une indication du **genre de subdivision de recensement**, par exemple, Granby, V (pour la « ville » de Granby) et Granby, CT (pour la « municipalité de canton » de Granby).

# Heures consacrées à offrir des soins ou de l'aide aux personnes âgées, sans paye ou sans salaire

Nombre d'heures que la personne a consacrées à offrir des soins ou de l'aide aux personnes âgées, sans salaire, pour des membres du ménage du recensé, pour d'autres membres âgés de la famille ne faisant pas partie du ménage, pour des amis ou des voisins pendant la semaine (du dimanche au samedi) ayant précédé le jour du recensement (le 15 mai 2001).

Les soins ou l'aide aux personnes âgées sans paye ou sans salaire ne comprennent pas le travail bénévole pour un organisme à but non lucratif, un organisme religieux, une oeuvre de charité ou un groupe communautaire ni le travail sans paye dans une ferme ou une entreprise familiale ou dans l'exercice d'une profession.

# Heures consacrées aux soins des enfants, sans pave ou sans salaire

Nombre d'heures que la personne a consacrées à donner des soins aux enfants, sans paye ou sans salaire. Sont incluses les heures consacrées à donner des soins aux enfants, sans paye ou sans salaire, pour des membres du ménage du recensé, pour d'autres membres de la famille ne faisant pas partie du ménage, pour des amis ou des voisins ou d'autres membres de la famille à l'extérieur du ménage pendant la semaine (du dimanche au samedi) ayant précédé le jour du recensement (le 15 mai 2001).

Les soins aux enfants sans paye ou sans salaire ne comprennent pas le travail bénévole pour un organisme à but non lucratif, un organisme religieux, une oeuvre de charité ou un groupe communautaire ni le travail sans paye dans une ferme ou une entreprise familiale ou dans l'exercice d'une profession.

# Heures consacrées aux travaux ménagers, sans paye ou sans salaire

Nombre d'heures que la personne a consacrées aux travaux ménagers, à l'entretien de la maison ou du jardin, sans paye ou sans salaire, pendant la semaine (du dimanche au samedi) ayant précédé le jour du recensement (le 15 mai 2001). Sont incluses les heures consacrées aux travaux ménagers, sans paye ou sans salaire, pour des membres du ménage du recensé, pour d'autres membres de la famille ne faisant pas partie du ménage, pour des amis ou des voisins.

Les travaux ménagers sans paye ou sans salaire ne comprennent pas le travail bénévole pour un organisme à but non lucratif, un organisme religieux, une oeuvre de charité ou un groupe communautaire ni le travail sans paye dans une ferme ou une entreprise familiale ou dans l'exercice d'une profession.

#### Identité autochtone

Personne ayant déclaré appartenir à au moins un groupe autochtone, c'est-à-dire Indien de l'Amérique du Nord, Métis ou Inuit (Esquimau) et/ou personne ayant déclaré être un Indien des traités ou un Indien inscrit tel que défini par la Loi sur les Indiens du Canada et/ou personne ayant déclaré appartenir à une bande indienne ou à une première nation. Lors du recensement de 1991 et des recensements antérieurs, la population autochtone était déterminée au moyen de la question sur l'origine ethnique (ancêtres). Au recensement de 1996, on a ajouté une question sur la propre perception du recense face à son identité autochtone. La question du recensement de 2001 est la même que celle de 1996.

# Industrie (basée sur le Système de classification des industries de l'Amérique du Nord de 1997 [SCIAN])

Nature générale de l'activité de l'établissement où travaille la personne. Si la personne n'avait pas d'emploi au cours de la semaine (du dimanche au samedi) ayant précédé le recensement (le 15 mai 2001), elle devait donner des renseignements sur l'emploi qu'elle avait occupé le plus longtemps depuis le 1er janvier 2000. Les personnes qui avaient deux emplois ou plus devaient fournir des renseignements sur celui auquel elles avaient consacré le plus grand nombre d'heures de travail.

Les données sur l'industrie du recensement de 2001 sont produites en fonction du Système de classification des industries de l'Amérique du Nord (SCIAN) de 1997. Ce dernier, qui assure une meilleure comparabilité entre les données sur l'industrie des trois partenaires de l'Accord de libre-échange nord-américain (ALENA) (Canada, États-Unis et Mexique), consiste en un répertoire systématique et détaillé des industries regroupées en 20 secteurs, 99 sous-secteurs et 300 groupes. Les critères utilisés pour créer ces catégories sont la similitude des structures d'intrants, des qualifications de la main-d'oeuvre ou des processus de production utilisés par l'établissement. Pour obtenir plus de renseignements au sujet de cette classification, reportez-vous au Système de classification des industries de l'Amérique du Nord, Canada, 1997, n° 12-501-XPF au catalogue.

La variable Industrie (selon le SCIAN de 1997) ne permet pas d'établir de comparaisons directes avec les données sur l'industrie des recensements antérieurs. Il faut utiliser la Classification type des industries de 1980 pour effectuer des comparaisons entre les données des recensements de 1986, 1991. 1996 et 2001.

### Langue maternelle

Première langue apprise à la maison dans l'enfance et encore comprise par le recensé au moment du recensement.

# Langue parlée à la maison

Langue que le recensé parlait le plus souvent à la maison ou de façon régulière au moment du recensement.

# Langue utilisée au travail

Cette question portait sur la langue le plus souvent utilisée au travail par le recensé au moment du recensement. Des données sur les autres langues utilisées au travail de façon réqulière ont aussi été recueillies.

#### Lieu de naissance du répondant

Provinces ou territoires de naissance pour les répondants nés au Canada ou pays de naissance pour les répondants nés à l'extérieur du Canada.

# Lieu de résidence 1 an auparavant (mobilité)

La mobilité est déterminée d'après le lien entre le domicile habituel d'une personne le jour du recensement et son domicile habituel un an plus tôt. Il s'agit d'une personne n'ayant pas déménagé si son domicile n'a pas changé dans l'intervalle; sinon, il s'agit d'une personne ayant déménagé. Cette catégorisation correspond à la mobilité (1 an auparavant). Dans la catégorie des personnes ayant déménagé, on peut également distinguer les non-migrants et les migrants; cette distinction correspond au statut migratoire.

Les personnes n'ayant pas déménagé sont celles qui, le jour du recensement, demeuraient à la même adresse que celle où elles résidaient un an plus tôt.

Les personnes ayant déménagé sont celles qui, le jour du recensement, demeuraient à une autre adresse que celle où elles résidaient un an plus tôt.

Les non-migrants sont des personnes ayant déménagé qui, le jour du recensement, demeuraient à une autre adresse mais dans la même subdivision de recensement (SDR) que celle où elles résidaient un an plus tôt.

Les **migrants** sont des personnes ayant déménagé qui, le jour du recensement, demeuraient dans une SDR autre que celle où elles résidaient un an plus tôt (migrants internes) ou qui résidaient à l'extérieur du Canada un an plus tôt (migrants externes).

Les migrants infraprovinciaux sont des personnes ayant déménagé qui, le jour du recensement, demeuraient dans une subdivision de recensement autre que celle où elles résidaient un an plus tôt, dans la même province.

Les migrants interprovinciaux sont des personnes ayant déménagé qui, le jour du recensement, demeuraient dans une subdivision de recensement autre que celle où elles résidaient un an plus tôt, dans une province différente.

# Lieu de résidence 5 ans auparavant (mobilité)

La mobilité est déterminée d'après le lien entre le domicile habituel d'une personne le jour du recensement et son domicile habituel cinq ans plus tôt. Il s'agit d'une personne n'ayant pas déménagé si son domicile n'a pas changé dans l'intervalle; sinon, il s'agit d'une personne ayant déménagé. Cette catégorisation correspond à la mobilité (5 ans auparavant). Dans la catégorie des personnes ayant déménagé, on peut également distinguer les non-migrants et les migrants; cette distinction correspond au statut migratoire.

Les personnes n'ayant pas déménagé sont celles qui, le jour du recensement, demeuraient à la même adresse que celle où elles résidaient cinq ans plus tôt.

Les personnes ayant déménagé sont celles qui, le jour du recensement, demeuraient à une autre adresse que celle où elles résidaient cinq ans plus tôt.

Les non-migrants sont des personnes ayant déménagé qui, le jour du recensement, demeuraient à une autre adresse mais dans la même subdivision de recensement (SDR) que celle où elles résidaient cinq ans plus tôt.

Les **migrants** sont des personnes ayant déménagé qui, le jour du recensement, demeuraient dans une SDR autre que celle où elles résidaient cinq ans plus tôt (migrants internes) ou qui résidaient à l'extérieur du Canada cinq ans plus tôt (migrants externes).

Les migrants infraprovinciaux sont des personnes ayant déménagé qui, le jour du recensement, demeuraient dans une subdivision de recensement autre que celle où elles résidaient cinq ans plus tôt, dans la même province.

Les migrants interprovinciaux sont des personnes ayant déménagé qui, le jour du recensement, demeuraient dans une subdivision de recensement autre que celle où elles résidaient cinq ans plus tôt, dans une province différente.

### Logement privé

Ensemble distinct de pièces d'habitation ayant une entrée privée donnant sur l'extérieur ou sur un corridor, un hall, un vestibule ou un escalier commun à l'intérieur. L'entrée doit donner accès au logement sans que l'on ait à passer par les pièces d'habitation de quelqu'un d'autre. Le logement doit répondre aux deux conditions qui le rendent propre à l'habitation durant toute l'année:

- a) avoir une source de chauffage ou d'énergie (comme en atteste la présence d'une cheminée, de fils électriques, de tuyaux ou compteurs pour l'huile [mazout] ou le gaz, d'une génératrice, de bois de chauffage, d'ampoules électriques, d'une thermopompe, de panneaux solaires, etc.);
- b) fournir un espace clos permettant de s'abriter des intempéries (comme en atteste la présence de murs d'enceinte et d'un toit ainsi que de portes et fenêtres offrant une protection contre le vent, la pluie et la neige).

Pour les besoins du recensement, on classe les logements privés comme logements privés ordinaires et logements marginaux occupés. Les logements privés ordinaires se subdivisent en trois grandes catégories : les logements occupés (par des résidents habituels), les logements occupés par des résidents étrangers et/ou temporaires et les logements inoccupés. Les logements marginaux sont classés comme logements occupés par des résidents habituels ou comme logements occupés par des résidents étrangers et/ou temporaires. Les logements marginaux inoccupés le jour du recensement ne font pas partie du parc immobilier.

# Logement privé occupé

Logement privé occupé de façon permanente par une personne ou un groupe de personnes. Sont également inclus dans cette catégorie les logements privés dont les résidents habituels sont temporairement absents le jour du recensement. Sauf indication contraire, toutes les données présentées dans les produits sur le logement ont trait aux logements privés occupés et non aux logements privés inoccupés ou aux logements occupés par des résidents étrangers et/ou temporaires uniquement.

# Loyer brut

Total des montants mensuels moyens versés par les ménages locataires au titre de l'habitation.

# Ménage privé

Personne ou groupe de personnes (autres que des résidents étrangers) occupant un logement privé et n'ayant pas de domicile habituel ailleurs au Canada.

#### Minorités visibles

Groupe de minorités visibles auquel le recensé appartient. Selon la *Loi sur l'équité en matière d'emploi*, font partie des minorités visibles « les personnes, autres que les Autochtones, qui ne sont pas de race blanche ou qui n'ont pas la peau blanche ».

La population des minorités visibles comprend les groupes suivants : Chinois, Sud-Asiatique, Noir, Philippin, Latino-Américain, Asiatique du Sud-Est, Arabe, Asiatique occidental, Coréen, Japonais, Minorité visible, n.i.a. et Minorités visibles multiples.

#### Mode d'occupation

Indique si le logement est possédé ou loué par un membre du ménage, ou s'il s'agit d'un logement de bande (dans une réserve ou un établissement indien).

#### Mode de transport

Mode de transport utilisé pour se rendre au travail par les personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui ont travaillé depuis le 1er janvier 2000. Les personnes qui ont indiqué qu'elles n'avaient pas d'adresse de travail fixe, ou ont précisé l'adresse d'un lieu habituel de travail, devaient inscrire le moyen de transport utilisé le plus souvent pour faire la navette entre le domicile et le travail. La variable se rapporte habituellement à l'emploi occupé par les recensés au cours de la semaine ayant précédé le recensement. Toutefois, dans le cas des personnes qui n'ont pas travaillé cette semaine-là, mais qui avaient travaillé à un moment quelconque depuis le 1er janvier 2000, les données portent sur l'emploi occupé le plus longtemps au cours de cette période.

Les personnes qui utilisaient plus d'un moyen de transport devaient indiquer seulement celui qu'elles utilisaient pour faire la plus grande partie du trajet. En conséquence, la question a permis de recueillir des données sur le principal mode de transport utilisé pour se rendre au travail. Elle ne permet toutefois pas d'obtenir des données sur l'utilisation de plusieurs modes de transport, la variation saisonnière dans le choix du mode de transport, ni sur les déplacements faits à d'autres fins que pour faire la navette entre le domicile et le travail.

# Origine autochtone

Personne ayant indiqué appartenir à au moins un groupe autochtone à la question sur l'origine ethnique, c'est-à-dire Indien de l'Amérique du Nord, Métis ou Inuit (Esquimau). L'origine ethnique se rapporte au(x) groupe(s) ethnique(s) ou culturel(s) auquel (auxquels) appartenaient les ancêtres du recensé. (Voir Origine ethnique.)

### Origine ethnique

Groupe(s) ethnique(s) ou culturel(s) auquel (auxquels) appartenaient les ancêtres du recensé.

# Période d'immigration

Tranches d'années établies d'après les réponses à la question sur l'année d'immigration. Par année d'immigration, on entend l'année au cours de laquelle la personne a obtenu le statut d'immigrant recu pour la première fois.

# Période de construction

Période au cours de laquelle l'immeuble ou le logement a été construit.

# Personnes hors famille économique

Membres d'un ménage qui ne sont pas membres d'une famille économique. Les personnes qui vivent seules sont toujours comprises dans cette catégorie.

#### **Pièces**

Nombre de pièces dans un logement. Une pièce est un espace fermé à l'intérieur d'un logement, fini et habitable toute l'année.

# Plus haut niveau de scolarité atteint

Dernière année d'études primaires ou secondaires, terminée ou non, ou dernière année universitaire ou collégiale terminée. Dans la hiérarchie de la scolarité, les études universitaires sont classées au-dessus des études collégiales. En outre, la personne qui a obtenu un grade, certificat ou diplôme se trouve classée à un échelon audessus de celle qui a un nombre d'années de scolarité plus élevé, terminées ou non, mais qui n'a pas de titre scolaire.

### Population des immigrants

Personnes ayant le statut d'immigrant reçu au Canada, ou l'ayant déjà eu. Un immigrant reçu est une personne à qui les autorités de l'immigration ont accordé le droit de résider au Canada en permanence. Certains immigrants résident au Canada depuis un certain nombre d'années, alors que d'autres sont arrivés récemment. La plupart des immigrants sont nés à l'extérieur du Canada, mais un petit nombre d'entre eux sont nés au Canada.

# Population des non-immigrants

Personnes qui sont des citoyens canadiens de naissance. Bien que la plupart de ces personnes soient nées au Canada, un petit nombre d'entre elles sont nées à l'étranger de parents canadiens.

# Première langue officielle parlée

Variable élaborée pour l'application de la Loi sur les langues officielles.

#### Présence d'enfants

Nombre d'enfants dans les ménages privés selon le groupe d'âge.

# Principales dépenses de propriété ou loyer brut, sous forme de pourcentage du revenu du ménage

Proportion du revenu mensuel total moyen du ménage en 2000 consacrée aux principales dépenses de propriété (dans le cas des logements occupés par leur propriétaire) ou au loyer brut (dans le cas des logements occupés par un locataire). Voici comment ces résultats sont obtenus :

| a) | Logements      | non | agricoles | occupés | par | leur |
|----|----------------|-----|-----------|---------|-----|------|
|    | propriétaire : |     |           |         |     |      |

|      | Principales dépenses de propriété        | Χ   | 100 | =   |        | %    |
|------|--|-----|-----|-----|--------|------|
| (Rev | venu annuel total du ménage en 2000) /12 |     |     |     |        |      |
| b)   | Logements non agricoles occupés          | par | un  | loc | cataiı | re : |

Loyer brut X 100 = %

(Revenu annuel total du ménage en 2000) /12

# Profession (basée sur la Classification nationale des professions pour statistiques de 2001 [CNP–S de 2001])

Genre de travail que faisaient les personnes pendant la semaine de référence, défini d'après le type d'emploi occupé par le recensé et la description des tâches les plus importantes qui s'y rattachent. Si le recensé n'avait pas d'emploi au cours de la semaine (du dimanche au samedi) ayant précédé le recensement (le 15 mai 2001), les données portent sur l'emploi qu'il avait occupé le plus longtemps depuis le 1° janvier 2000. Les personnes qui avaient deux emplois ou plus devaient donner des renseignements sur l'emploi auquel elles avaient consacré le plus d'heures de travail.

Les données sur la profession du recensement de 2001 sont produites selon la Classification nationale des professions pour statistiques de 2001 (CNP-S de 2001). Cette classification comprend quatre niveaux d'agrégation. Elle comprend 10 grandes catégories professionnelles englobant 47 grands groupes, lesquels comprennent à leur tour 140 sous-groupes. Ces sous-groupes renferment 520 groupes de base. Les titres de profession sont classés selon le niveau de scolarité, de formation ou de compétence nécessaire pour exercer cette profession, ainsi que le genre de travail exécuté, déterminé d'après les tâches, les fonctions et les responsabilités reliées au poste.

Pour plus de renseignements sur la CNP-S de 2001, se reporter à la *Classification nationale des professions pour statistiques 2001*, n° 12-583-XPF au catalogue.

#### Province ou territoire

Les termes « province » et « territoire » désignent les principales unités politiques du Canada. Du point de vue statistique, les provinces et les territoires sont des régions de base selon lesquelles les données du recensement sont totalisées et recoupées. Le Canada est divisé en dix provinces et trois territoires.

# Région métropolitaine de recensement (RMR) et agglomération de recensement (AR)

Une région métropolitaine de recensement (RMR) ou une agglomération de recensement (AR) est formée d'une ou de plusieurs municipalités adjacentes situées autour d'une grande région urbaine (appelée noyau urbain). Un noyau urbain doit compter au moins 10 000 habitants pour former une agglomération de recensement et au moins 100 000 habitants pour former une région métropolitaine de recensement. Pour être incluses dans une RMR ou une AR, les autres municipalités adjacentes doivent avoir un degré d'intégration élevé avec la région urbaine centrale, lequel est déterminé par le pourcentage de navetteurs établi d'après les données du recensement sur le lieu de travail.

Si la population du noyau urbain d'une AR devient inférieure à 10 000 habitants, l'AR est retirée du programme. Cependant, une RMR restera une RMR même si la population de son noyau urbain devient inférieure à 100 000 habitants. Les régions urbaines comprises dans une RMR ou une AR qui ne sont pas contigués à un noyau urbain sont appelées banlieues urbaines, tandis que les régions rurales sont appelées banlieues rurales.

Lorsque le noyau urbain d'une AR compte au moins 50 000 habitants d'après les chiffres du recensement, il est subdivisé en secteurs de recensement. Les secteurs de recensement de l'AR sont maintenus même si, ultérieurement, la population de son noyau urbain devient inférieure à 50 000 habitants. Toutes les RMR sont subdivisées en secteurs de recensement.

#### Religion

Confession religieuse précise ou appartenance à un groupe ou à un organisme religieux, à une secte, à un culte ou à toute autre collectivité ayant adopté une religion ou un système de croyances quelconque.

#### Revenu total

Revenu total en espèces, reçu par les personnes âgées de 15 ans et plus durant l'année civile 2000, provenant des sources suivantes:

- salaires et traitements (total);
- revenu agricole net:
- revenu non agricole net de l'exploitation d'une entreprise non constituée en société et/ou de l'exercice d'une profession;
- prestations fiscales canadiennes pour enfants;
- pension de sécurité de la vieillesse et supplément de revenu garanti;
- prestations du Régime de rentes du Québec ou du Régime de pensions du Canada;
- prestations d'assurance-emploi;
- autre revenu provenant de sources publiques:
- dividendes, intérêts d'obligations, de dépôts et de certificats d'épargne, et autre revenu de placements;
- pensions de retraite et rentes, y compris les rentes de REÉR et de FERR;
- autre revenu en espèces.

Recettes non comptées comme revenu — Le concept du revenu excluait les gains et les pertes au jeu, les prix gagnés à la loterie, les sommes forfaitaires reçues en héritage au cours de l'année, les gains et les pertes en capital, le produit de la vente d'une propriété, les remboursements d'impôt sur le revenu, les remboursements de prêts reçus, les règlements monétaires forfaitaires d'assurance, les remboursements d'impôt foncier, les remboursements de cotisations à un régime de pensions ainsi que les revenus en nature tels que les repas et l'hébergement gratuits ou les produits agricoles cultivés et consommés à la ferme.

Revenu moyen des particuliers – Revenu total moyen pondéré des personnes âgées de 15 ans et plus qui ont déclaré un revenu en 2000. Pour établir le revenu moyen à partir des données non arrondies, il faut diviser le revenu agrégé d'un groupe de particuliers (par exemple, les hommes de 45 à 54 ans) par le nombre de personnes qui ont déclaré un revenu dans ce groupe.

Les revenus moyen et médian des particuliers, ainsi que les erreurs types de revenu moyen correspondantes, sont calculés pour les personnes qui sont âgées d'au moins 15 ans et qui ont un revenu (positif ou négatif). En ce qui concerne tous les autres univers (p. ex. les familles de recensement ou les ménages privés), ces statistiques sont calculées pour toutes les unités, qu'un revenu ait été déclaré ou non.

Revenu médian des particuliers – Valeur centrale séparant en deux parties égales la répartition par tranches de revenu d'un groupe donné de personnes ayant un revenu; la première partie regroupe les personnes ayant un revenu inférieur à la médiane, et la seconde, les personnes ayant un revenu supérieur à la médiane. Le revenu médian pour un groupe de personnes est calculé à partir des données non arrondies pour les membres de ce groupe (par exemple, les hommes de 45 à 54 ans) qui ont déclaré un revenu.

Les revenus moyen et médian des particuliers, ainsi que les erreurs types de revenu moyen correspondantes, sont calculés pour les personnes qui sont âgées d'au moins 15 ans et qui ont un revenu (positif ou négatif). En ce qui concerne tous les autres univers (p. ex. familles de recensement ou ménages privés), ces statistiques sont calculées pour toutes les unités, qu'un revenu ait été déclaré ou non.

Erreur type de revenu moyen – Estimation de l'erreur type de revenu moyen pour une répartition par tranches de revenu. Si elle est interprétée de la façon décrite ci-après, elle sert d'indicateur brut de la précision avec laquelle le revenu moyen a été estimé. Pour environ 68 % des échantillons qui peuvent être tirés de la base de sondage, la différence entre l'estimation du revenu moyen calculée pour un échantillon et le chiffre correspondant obtenu par un dénombrement exhaustif est inférieure à une erreur type. Pour près de 95 % des échantillons possibles, la différence est de moins de deux erreurs types et, dans environ 99 % des échantillons, elle est inférieure à environ deux erreurs types et demie.

# Salarié ou bénéficiaire d'un revenu d'emploi

Revenu total des personnes âgées de 15 ans et plus ayant reçu un revenu au cours de l'année civile 2000 sous forme de salaires et traitements, de revenu net de l'exploitation d'une entreprise non agricole non constituée en société et/ ou dans l'exercice d'une profession et de revenu net proyenant d'un travail autonome agricole.

# Secteur de recensement (SR)

Les secteurs de recensement (SR) sont de petites régions géographiques relativement stables qui comptent habituellement entre 2 500 et 8 000 habitants. Ils sont créés au sein de régions métropolitaines de recensement et d'agglomérations de recensement dont le noyau urbain compte 50 000 habitants ou plus d'après le recensement précédent.

Un comité de spécialistes locaux (par exemple, des planificateurs, des travailleurs sociaux, des travailleurs du secteur de la santé et des éducateurs) délimitent initialement les SR de concert avec Statistique Canada. Une fois qu'une région métropolitaine de recensement (RMR) ou qu'une agglomération de recensement (AR) a été divisée en secteurs de recensement, les secteurs de recensement sont maintenus même si, ultérieurement, la population du noyau urbain de la RMR ou de l'AR devient inférieure à 50 000 habitants.

### Seuils de faible revenu (SFR)

Les mesures du faible revenu appelées seuils de faible revenu (SFR) ont été établies pour la première fois au Canada en 1968, d'après les données sur le revenu du recensement de 1961 et les régimes de dépenses des familles en 1959. À cette époque, les régimes de dépenses indiquaient que les familles canadiennes consacraient environ 50 % de leur revenu total à la nourriture, au logement et à l'habillement. On a arbitrairement estimé que les familles consacrant 70 % ou plus de leur revenu (soit 20 points de pourcentage de plus que la moyenne) à ces biens de première nécessité sont « dans le besoin ». À partir de cette hypothèse, des seuils de faible revenu ont été établis pour cing différentes tailles de famille.

Par la suite, les seuils de faible revenu ont été révisés d'après les données nationales sur les dépenses des familles pour 1969, 1978, 1986 et 1992. Selon ces données, les familles canadiennes consacraient en moyenne 42 % de leur revenu total aux biens de première nécessité en 1969, contre 38,5 % en 1978, 36,2 % en 1986 et 34,7 % en 1992. Depuis 1992, les données de l'enquête sur les dépenses des familles indiquent que cette proportion est demeurée relativement stable. En ajoutant la différence initiale de 20 points au niveau de base des dépenses au titre des biens de première nécessité, de nouveaux seuils de faible revenu ont été fixés selon la taille de la famille et le degré d'urbanisation. Depuis 1992, ces seuils de faible revenu ont été mis à jour chaque année d'après les changements subis par l'indice des prix à la consommation.

#### Sexe

Qualité d'homme ou de femme.

# Situation des particuliers dans la famille de recensement

Classement des personnes selon qu'elles appartiennent ou non à une famille de recensement.

Membres d'une famille de recensement – Membres d'un ménage qui appartiennent à une famille de recensement. Ces personnes se répartissent dans les catégories suivantes:

Époux et épouses - Personnes de sexe opposé qui sont légalement mariées l'une à l'autre et qui habitent le même logement.

Partenaires en union libre – Personnes de sexe opposé ou de même sexe qui ne sont pas légalement mariées l'une à l'autre, mais qui vivent comme couple dans le même logement.

Parent seul – Mère ou père, sans époux(se) ni partenaire en union libre, qui habite un logement avec au moins un de ses enfants.

Enfants – Fils ou filles apparentés par le sang, par alliance ou par adoption, peu importe leur âge ou leur état matrimonial, qui vivent dans le même logement que leur(s) parent(s), ainsi que les petits-enfants des ménages où les parents sont absents. Les fils et les filles qui vivent avec leur conjoint(e), ou avec un(e) partenaire en union libre ou avec un ou plusieurs de leurs propres enfants, ne sont pas considérés comme des membres de la famille de recensement de leur(s) parent(s), même s'ils vivent dans le même logement. En outre, les fils et les filles qui n'habitent pas dans le même logement que leur(s) parent(s) ne sont pas considérés comme des membres de la famille de ce(s) dernier(s). Les personnes suivantes font donc partie de la catégorie « enfants » :

Fils et/ou filles jamais mariés faisant partie d'une famille de recensement, comme dans le cas des recensements précédant celui de 2001.

Autres fils et/ou filles faisant partie d'une famille de recensement qui n'auraient pas été inclus dans la famille de recensement de leurs parents selon le concept précédent.

Petits-enfants vivant dans le même ménage que leurs grands-parents, en l'absence des parents.

Personnes hors famille de recensement – Membres d'un ménage qui ne font pas partie d'une famille de recensement. Ils peuvent être apparentés à la Personne 1 (p. ex. soeur, beau-frère, cousine ou grand-père de la Personne 1), ou non apparentés (p. ex. chambreur, colocataire ou employé). Les personnes qui vivent seules sont toujours considérées comme des personnes hors famille de recensement.

# Situation des particuliers dans le ménage

Classement des personnes selon qu'elles sont des membres d'un ménage familial ou non familial et selon qu'elles sont des membres d'une famille de recensement ou des personnes hors famille de recensement.

#### Statut d'immigrant reçu

Personne à qui les autorités de l'immigration ont accordé le droit de résider au Canada en permanence.

#### Structure de la famille de recensement

Classement des familles de recensement en couples mariés (avec ou sans enfants des deux conjoints ou de l'un d'eux), en couples en union libre (avec ou sans enfants des deux partenaires ou de l'un deux) et en familles monoparentales selon le sexe du parent. Un couple vivant en union libre peut être de sexe opposé ou de même sexe. Les « enfants » dans une famille de recensement incluent les petits-enfants vivant dans le même ménage que leurs grands-parents, en l'absence des parents.

# Subdivision de recensement (SDR)

Subdivision de recensement (SDR) est un terme générique qui désigne les municipalités (telles que définies par les lois provinciales) ou les territoires considérés comme étant des équivalents municipaux à des fins statistiques (par exemple, les réserves indiennes, les établissements indiens et les territoires non organisés).

#### Superficie des terres

La superficie des terres correspond à la surface en kilomètres carrés des parties des terres des régions géographiques normalisées

Les données sur les superficies des terres ne sont pas officielles et servent uniquement à calculer la densité de la population.

#### Taille du ménage

Nombre de personnes dans un ménage privé.

# Type de construction résidentielle

Type de construction et/ou caractéristiques du logement (maison individuelle non attenante, appartement dans une tour d'habitation, maison en rangée, habitation mobile, etc.).

#### Union libre

Par union libre, on entend deux personnes de sexe opposé ou de même sexe qui vivent ensemble en tant que couple sans être légalement mariées l'une à l'autre.

### Univers de la population

L'univers de la population du recensement de 2001 comprend les groupes suivants :

- les citoyens canadiens (par naissance ou par naturalisation) et les immigrants reçus ayant un lieu habituel de résidence au Canada;
- les citoyens canadiens (par naissance ou par naturalisation) et les immigrants reçus qui sont à l'étranger, dans une base militaire ou en mission diplomatique;
- les citoyens canadiens (par naissance ou par naturalisation) et les immigrants reçus qui sont en mer ou dans des ports à bord de navires marchands battant pavillon canadien;
- les personnes ayant un lieu habituel de résidence au Canada qui demandent le statut de réfugié et les membres de leur famille vivant avec elles;
- les personnes ayant un lieu habituel de résidence au Canada, qui sont titulaires d'un permis de séjour pour étudiants (visas pour étudiants, permis pour étudiants) et les membres de leur famille vivant avec elles;
- les personnes ayant un lieu habituel de résidence au Canada, qui sont titulaires d'un permis de travail et les membres de leur famille vivant avec elles;
- les personnes ayant un lieu habituel de résidence au Canada, qui sont titulaires d'un permis ministériel (y compris les prolongements) et les membres de leur famille vivant avec elles.

Aux fins du recensement, les personnes des quatre derniers groupes de la liste sont des « résidents non permanents ».

# Valeur du logement

Montant en dollars que s'attendrait à recevoir le propriétaire s'il vendait son logement.

# Qualité des données

#### Généralités

Le recensement de 2001 a été une entreprise complexe et de grande envergure. Bien que l'on ait déployé des efforts considérables pour assurer le respect de normes élevées au cours des opérations de la collecte et du traitement, il est inévitable que les estimations résultantes soient entachées d'erreurs. Les utilisateurs des données du recensement doivent savoir que ces erreurs existent et doivent avoir une idée générale de leurs principales composantes afin d'être en mesure de déterminer l'utilité des données produites et d'évaluer les risques qu'ils courent en tirant des conclusions ou en prenant des décisions à partir de ces données.

Des erreurs peuvent se produire pratiquement à toutes les étapes du recensement, depuis la préparation des documents jusqu'au traitement des données, en passant par l'établissement des listes de logements et la collecte des données. Certaines erreurs, qui surviennent par hasard, ont tendance à s'annuler lorsque les réponses fournies par les divers répondants sont agrégées pour un groupe assez important. Dans le cas d'erreurs de cette nature l'estimation. correspondante sera d'autant plus précise que le groupe visé sera grand. C'est pourquoi on conseille aux utilisateurs de faire preuve de prudence lorsqu'ils utilisent des estimations relatives à de petits groupes. Toutefois, certaines erreurs peuvent survenir de facon plus systématique et introduire un « biais » dans les estimations. Comme ce biais persiste quelle que soit la taille du groupe pour lequel les réponses sont agrégées et comme il est particulièrement difficile d'en mesurer l'importance, les erreurs systématiques posent pour la plupart des utilisateurs de données des problèmes plus graves que les erreurs aléatoires mentionnées plus haut.

En ce qui concerne les données du recensement en général, les principaux types d'erreurs sont les suivants :

- les erreurs de couverture qui se produisent lorsqu'on oublie des logements ou des personnes, qu'on les dénombre à tort ou qu'on les compte plus d'une fois;
- les erreurs dues à la non-réponse qui surviennent lorsqu'on n'a pu obtenir de réponses d'un certain nombre de ménages ou de personnes en raison d'une absence prolongée ou pour toute autre raison;
- les erreurs de réponse qui surviennent lorsque le répondant, ou parfois le recenseur, a mal interprété une question du recensement et a inscrit une mauvaise réponse ou s'est tout simplement trompé de case de réponse;

- les erreurs de traitement qui peuvent se produire à diverses étapes, notamment lors du codage, lorsque les réponses en lettres sont converties en codes numériques; lors de la saisie des données, lorsque les préposés à l'entrée des données transfèrent dans un format électronique les réponses figurant au questionnaire du recensement; lors de l'imputation, lorsqu'une réponse « valide », mais pas nécessairement exacte, est insérée dans un enregistrement par l'ordinateur pour remplacer une réponse manquante ou « invalide » (« valide » et « invalide » renvoient à la cohérence de la réponse, compte tenu des autres renseignements compris dans l'enregistrement);
- les erreurs d'échantillonnage qui s'appliquent uniquement aux questions supplémentaires figurant dans le questionnaire complet distribué à un échantillon de un cinquième des ménages. Ces erreurs résultent du fait que les réponses à ces questions supplémentaires, une fois pondérées pour représenter l'ensemble de la population, diffèrent inévitablement des réponses qu'on aurait obtenues si l'on avait posé ces questions à tous les ménages.

Les types d'erreur mentionnés plus haut ont tous une composante aléatoire et une composante systématique. Toutefois, la composante systématique de l'erreur d'échantillonnage est d'ordinaire très petite comparativement à sa composante aléatoire. Dans le cas des autres erreurs non dues à l'échantillonnage, tant la composante aléatoire que la composante systématique peuvent être importantes.

#### Erreurs de couverture

Les erreurs de couverture ont une incidence directe sur la précision des chiffres du recensement, c'est-à-dire sur la taille des divers univers du recensement : la population, les familles, les ménages et les logements. Bien que des mesures aient été prises pour corriger certaines erreurs identifiables, les chiffres définitifs sont toujours entachés d'une certaine erreur parce que des personnes ou des logements ont été oubliés, dénombrés à tort ou comptés plus d'une fois.

L'oubli de logements ou de personnes se traduit par un sousdénombrement. Des logements peuvent être oubliés en raison soit d'une mauvaise interprétation des limites du secteur de dénombrement (SD), soit qu'ils n'ont pas l'apparence de logements ou soit qu'ils semblent inhabitables. Des personnes peuvent être oubliées parce que leur logement est oublié ou classé comme inoccupé, ou parce que le répondant a mai interprété les instructions concernant les personnes à inclure sur le questionnaire. Enfin, certaines personnes peuvent être oubliées parce qu'elles n'ont pas de domicile habituel et qu'elles n'ont pas passé la nuit du recensement dans un logement.

Le dénombrement à tort ou le double compte de logements ou de personnes se traduit par un **surdénombrement**. Il peut y avoir surdénombrement de logements lorsque des constructions impropres à l'habitation sont classées comme logements (dénombrement à tort), lorsqu'il existe une certaine ambiguîté au sujet des limites des SD ou lorsque des unités d'habitation (par exemple, des chambres) sont comptées séparément plutôt que d'être considérées comme

faisant partie d'un seul logement (double compte). Les personnes peuvent être comptées plus d'une fois parce que leur logement a été compté deux fois ou parce que les lignes directrices concernant les personnes à inscrire dans le questionnaire ont été mal interprétées. À l'occasion, il arrive qu'une personne ne faisant pas partie de l'univers de la population du recensement, comme un résident étranger ou une personne fictive, soit dénombrée à tort. En moyenne, le surdénombrement est moins susceptible de se produire que le sous-dénombrement; les chiffres des logements et des personnes sont donc probablement légèrement sous-estimés.

Pour le recensement de 2001, trois études permettent de mesurer l'erreur de couverture. Dans le contexte de l'Étude sur la classification des logements, on a de nouveau visité des logements classés comme inoccupés afin de vérifier s'ils étaient réellement inoccupés le jour du recensement, et des logements dont le ménage a été classé comme non répondant afin de déterminer le nombre de résidents habituels et leurs caractéristiques. Les chiffres définitifs du recensement ont ensuite été corrigés pour tenir compte des personnes ou des ménages oubliés parce que leur logement avait été classé par erreur comme inoccupé. Il est aussi possible que les chiffres du recensement aient été corrigés pour tenir compte des logements dont le ménage a été classé comme non répondant. En dépit de ces ajustements, les chiffres définitifs peuvent tout de même être entachés d'un certain sous-dénombrement. Le sous-dénombrement tend à être plus élevé pour certains segments de la population comme les jeunes adultes (plus particulièrement ceux de sexe masculin) et les personnes récemment immigrées. L'Étude de la contre-vérification des dossiers permet de mesurer le sous-dénombrement résiduel pour le Canada, de même que pour chaque province et chaque territoire. L'Étude sur le surdénombrement a pour objet d'étudier les erreurs de surdénombrement. Ensemble, les résultats de l'Étude de la contre-vérification des dossiers et de l'Étude sur le surdénombrement fournissent une estimation du sousdénombrement net.

#### Autres erreurs non dues à l'échantillonnage

Alors que les erreurs de couverture ont une incidence sur le nombre d'unités comprises dans les divers univers du recensement, d'autres erreurs influent sur les caractéristiques de ces unités.

Il est parfois impossible d'obtenir une réponse complète d'un ménage, même si le logement a été classé comme étant occupé et un questionnaire y a été livré. Il se peut que les membres du ménage aient été absents pendant toute la période du recensement ou, en de rares occasions, que le membre responsable du ménage ait refusé de remplir le questionnaire. Il arrive plus souvent que le questionnaire soit retourné, mais qu'il y ait des questions laissées sans réponse. Des efforts sont déployés afin d'obtenir un questionnaire le plus complet possible. Les recenseurs contrôlent les questionnaires et assurent un suivi à l'égard de l'information manquante. Le travail du recenseur est ensuite vérifié par un surveillant et par un technicien du contrôle qualitatif. Malgré tout, il existe toujours un petit nombre de réponses manquantes à la fin de l'étape de la collecte, c'est-à-dire d'erreurs dues à la non-réponse. Bien que les réponses manquantes soient éliminées en cours de

traitement en remplaçant chacune d'elles par la réponse correspondante figurant dans un enregistrement « similaire », il est possible que certaines erreurs d'imputation s'y glissent. Cela est particulièrement grave lorsque les personnes non répondantes diffèrent des répondants sous certains aspects; en effet, cette procédure introduit un biais dû à la non-réponse.

Même lorsqu'une réponse est obtenue, il se peut qu'elle ne soit pas tout à fait exacte. Il est possible que le répondant ait mal interprété la question ou ait donné une réponse au jugé, surtout lorsqu'il répondait pour le compte d'un autre membre du ménage, qui était peut-être absent. Il est aussi possible que le répondant ait inscrit sa réponse au mauvais endroit sur le questionnaire. Ces erreurs sont désignées sous le nom d'erreurs de réponse. Bien que ces erreurs surviennent d'ordinaire parce que les répondants ont fourni des renseignements inexacts, elles peuvent aussi résulter d'erreurs commises par les recenseurs qui ont rempli certaines parties du questionnaire, comme le type de construction résidentielle, ou qui ont effectué le suivi pour obtenir une réponse manquante.

Certaines questions du recensement nécessitent une réponse en lettres. Pendant le traitement, on attribue un code numérique à ces réponses. Il est possible que des erreurs de codage se produisent lorsque la réponse écrite est ambiguë, incomplète ou difficile à lire, ou lorsque la liste des codes est longue (p. ex. principal domaine d'études, lieu de travail) l'étape formelle du contrôle qualitatif (CQ) permet de cerner et de rectifier les erreurs de codage et d'en réduire le nombre. À l'intérieur de chaque unité de travail, un échantillon des réponses est codé indépendamment une deuxième fois. La résolution des incohérences entre les premier et deuxième codages détermine la nécessité, s'il v a lieu, de coder à nouveau l'unité de travail. Exception faite pour le codage des variables de l'industrie et de la profession. la plupart des tâches de codage du recensement sont maintenant automatisées, ce qui a pour conséquence de réduire le nombre d'erreurs de codage.

Les renseignements figurant dans les questionnaires sont tapés dans un fichier informatique. Deux méthodes de résolution ordonnée sont utilisées pour limiter le nombre d'erreurs à la saisie des données. Dans un premier temps, certains contrôles (comme des vérifications d'étendue) sont effectués à mesure que les données sont entrées. Dans un second temps, on tape de nouveau à l'ordinateur un échantillon tiré de chaque lot de documents, puis on compare les entrées résultantes aux entrées initiales. Le travail non satisfaisant est ainsi circonscrit et corrigé et, si cela est nécessaire, le reste du lot est de nouveau saisi.

Une fois saisies, les données font l'objet de vérifications qui consistent à les soumettre à une série de contrôles informatiques visant à relever les réponses manquantes ou incohérentes. À l'étape de l'imputation, on substitue à ces dernières des réponses déduites à partir des autres données de l'enregistrement ou des réponses tirées d'un enregistrement donneur similaire. L'imputation permet d'obtenir une base de données complète dont les données correspondent aux chiffres du recensement et facilitent les

analyses multidimensionnelles. Même si des erreurs peuvent être introduites à l'étape de l'imputation, les méthodes utilisées ont fait l'objet de tests rigoureux visant à réduire au minimum les erreurs systématiques.

Diverses études sont réalisées afin d'évaluer la qualité des réponses obtenues dans le cadre du recensement de 2001. Ainsi, on a calculé les taux de non-réponse et les taux de rejet au contrôle pour chaque question. Ces taux peuvent permettre de déterminer le potentiel d'erreurs dues à la non-réponse et d'autres types d'erreurs. De même, les totalisations établies à partir des données du recensement de 2001 ont été ou seront comparées avec les estimations correspondantes obtenues à partir des données des recensements précédents, des enquêtes-échantillon (comme l'Enquête sur la population active) et de divers dossiers administratifs (comme les registres des naissances et le cadastre municipal). Ces comparaisons peuvent permettre de cerner les problèmes de qualité éventuels ou, à tout le moins, de relever les divergences entre les sources.

Outre ces comparaisons entre données agrégées, certaines études de couplage de microdonnées sont actuellement menées afin de comparer les réponses de certains particuliers obtenues au recensement à celles d'une autre source de renseignements. Pour un certain nombre de caractéristiques « stables » (comme l'âge, le sexe, la langue maternelle et le lieu de naissance), on compare les réponses obtenues auprès d'un échantillon de personnes à l'occasion du recensement de 2001 aux réponses obtenues des mêmes personnes à l'occasion du recensement de 1996.

# Erreurs d'échantillonnage

Les estimations obtenues en pondérant les réponses recueillies auprès d'un échantillon sont susceptibles d'être entachées d'erreurs en raison de la répartition des caractéristiques au sein de l'échantillon, qui n'est généralement pas identique à la répartition correspondante au sein de la population dans laquelle l'échantillon a été prélevé

L'erreur susceptible d'être introduite par l'échantillonnage variera en fonction de la rareté relative de la caractéristique étudiée au sein de la population. Lorsque la valeur contenue dans la case est élevée, cette erreur sera relativement faible proportionnellement à cette valeur. Lorsque la valeur contenue dans la case est faible, cette erreur sera relativement importante proportionnellement à cette valeur.

L'erreur susceptible d'être introduite par l'échantillonnage est d'ordinaire exprimée sous forme d'« erreur type ». Il s'agit de la racine carrée de la moyenne, calculée pour l'ensemble des échantillons de même taille prélevés selon le même plan d'échantillonnage, des carrés de l'écart de l'estimation obtenue à partir de l'échantillon par rapport à la valeur pour l'ensemble de la population.

Le tableau ci-dessous fournit des mesures approximatives de l'erreur type due à l'échantillonnage. Ces mesures sont données uniquement à titre indicatif.

Erreur type approximative due à l'échantillonnage pour les données-échantillon du recensement de 2001

| Valeur contenue<br>dans la case | Erreur type approximative |
|---------------------------------|---------------------------|
| 50 ou moins                     | 15                        |
| 100                             | 20                        |
| 200                             | 30                        |
| 500                             | 45                        |
| 1 000                           | 65                        |
| 2 000                           | 90                        |
| 5 000                           | 140                       |
| 10 000                          | 200                       |
| 20 000                          | 280                       |
| 50 000                          | 450                       |
| 100 000                         | 630                       |
| 500 000                         | 1 400                     |
|                                 |                           |

Les utilisateurs souhaitant déterminer l'erreur d'échantillonnage approximative pour une case de données dont la valeur a été obtenue à partir de l'échantillon de 20 % doivent choisir l'erreur type correspondant à l'entrée dans la colonne « Valeur contenue dans la case » ci dessus qui se rapproche le plus de celle qui figure dans la case de données de la totalisation en cause. En utilisant la valeur ainsi obtenue pour l'erreur type, l'utilisateur peut, en général et à juste titre, être certain que la valeur réelle pour la population dénombrée (ne tenant pas compte des formes d'erreurs autres que l'erreur d'échantillonnage) ne s'écarte pas de la valeur contenue dans la case dans une proportion supérieure ou inférieure à trois fois l'erreur type (p. ex., si la valeur contenue dans la case est 1 000, la fourchette à l'intérieur de laquelle se situe la valeur réelle serait de  $1000 \pm [3 \times 65]$  ou de  $1000 \pm 195$ ).

Les erreurs types données dans le tableau ci-dessus ne s'appliquent pas aux chiffres de population, de logements, de ménages ou de familles pour la région géographique étudiée (voir Échantillonnage et pondération ci-dessous). On peut déterminer l'effet de l'échantillonnage pour ces valeurs en les comparant à celles des produits correspondants contenant des données intégrales.

Il est à noter que l'effet du plan d'échantillonnage et de la méthode de pondération utilisés dans le cadre du recensement de 2001 variera d'une caractéristique à l'autre et d'une région géographique à l'autre. Il est donc possible que les valeurs de l'erreur type données dans le tableau ci-dessus sous-estiment ou surestiment l'erreur attribuable à l'échantillonnage.

#### Échantillonnage et pondération

Les données du recensement de 2001 sont soit des données intégrales (c'est-à-dire recueillies auprès de l'ensemble des ménages), soit des données-échantillon (c'est-à-dire recueillies auprès d'un échantillon aléatoire comprenant un ménage sur cinq) que l'on a pondérées pour obtenir des

estimations pour l'ensemble de la population. Les données ont été recueillies auprès d'un échantillon de 20 % et pondérées pour compenser pour l'échantillonnage. Tous les en-têtes de tableaux sont annotés en conséquence. On notera que, dans les réserves indiennes et les régions éloignées, toutes les données ont été recueillies auprès de l'ensemble de la population.

Il est possible que, pour une région géographique donnée, le total ou le total partiel pondéré de la population, des ménages, des logements ou des familles diffère du chiffre correspondant figurant dans les publications contenant des données intégrales. Ces variations sont attribuables à l'échantillonnage et au fait que les données intégrales n'excluent pas les pensionnaires d'établissements institutionnels, contrairement aux données-échantillon.

#### Confidentialité et arrondissement aléatoire

Afin de protéger le caractère confidentiel des renseignements fournis, les chiffres indiqués aux tableaux ont fait l'objet d'un arrondissement aléatoire qui supprime toute possibilité d'associer des données statistiques à une personne facilement reconnaissable. Selon cette méthode, tous les chiffres, y compris les totaux et les marges, sont arrondis de façon aléatoire (vers le haut ou vers le bas) jusqu'à un multiple de « 5 » et, dans certains cas, de « 10 ». Cette technique assure une protection efficace contre la divulgation sans ajouter d'erreur significative dans les données du recensement. Les utilisateurs doivent savoir que les totaux et les marges sont arrondis séparément et qu'ils ne correspondent pas nécessairement à la somme des chiffres arrondis séparément dans les répartitions. De plus, il faut s'attendre à ce que les totaux et les autres chiffres correspondants dans diverses totalisations du recensement présentent quelques légères différences. De même, la somme des pourcentages, qui sont calculés à partir de chiffres arrondis, ne correspond pas forcément à 100 %. Les statistiques d'ordre (médiane, quartiles, percentiles, etc.) ainsi que les mesures de dispersion comme l'erreur type sont calculées de la façon habituelle. Lorsqu'une statistique est définie comme le quotient de deux nombres (c'est le cas pour des moyennes, des pourcentages et des proportions), les deux nombres sont arrondis avant d'effectuer la division. S'il s'agit de revenu, de dépenses de propriété, de valeur du logement, d'heures travaillées, de semaines travaillées ou d'âge, la somme est définie comme le produit de la moyenne par la fréquence pondérée arrondie. Sinon, c'est la somme pondérée qui est arrondie. La distorsion importante pouvant résulter de l'arrondissement aléatoire dans le cas des cases de faible valeur mérite aussi d'être signalée. Cette distorsion peut entraîner une perte de précision pour les cases de données renfermant des chiffres peu élevés. De plus, une statistique est supprimée si le nombre actuel d'enregistrements ayant servi au calcul est inférieur à 4 ou si la somme du poids de ces enregistrements est inférieure à 10. En outre, dans le cas de valeurs exprimées en dollars, d'autres règles s'ajoutent. Ainsi, pour les produits normalisés, si toutes les valeurs sont égales, la statistique est supprimée. Pour tous les autres produits, la statistique est supprimée si l'étendue des valeurs est trop petite ou si toutes les valeurs sont inférieures, en valeur absolue, à un certain seuil.

Les utilisateurs devraient, lors de l'agrégation des données arrondies, être conscients de cette distorsion. Les erreurs dues à l'arrondissement ont tendance à s'annuler lorsque les chiffres contenus dans les cases sont agrégés de nouveau. Cependant, il est possible de réduire les distorsions en intégrant dans la mesure du possible les totaux partiels appropriés dans les totalisations.

Les utilisateurs désirant obtenir un maximum de précision peuvent aussi choisir de demander des totalisations personnalisées. Dans le cas de produits personnalisés, l'agrégation se fait à partir des enregistrements dans la base de données du recensement se rapportant aux particuliers. L'arrondissement aléatoire a lieu uniquement après que les cases de données ont été agrégées, ce qui réduit la distorsion au minimum.

Outre l'arrondissement aléatoire, on a adopté la technique de la **suppression des régions**, afin d'assurer encore mieux la confidentialité des réponses des particuliers.

Dans le cadre de la **suppression des régions**, toutes les données caractéristiques se rapportant aux régions géographiques dont la population est inférieure à une taille donnée sont supprimées. L'importance de la suppression est fonction des facteurs suivants:

- Si les données sont totalisées à partir de la base de données intégrales, elles sont supprimées si la population totale de la région est inférieure à 40 personnes.
- Si les données sont totalisées à partir de la base de données-échantillon, elles sont supprimées si la population totale de la région, à l'exclusion des pensionnaires d'un établissement institutionnel, est inférieure à 40 personnes, selon la base de données intégrales ou la base de données-échantillon.

Il y a quelques exceptions à ces règles :

- Les données renfermant une réparfition du revenu et les statistiques connexes sont supprimées si la population de la région, à l'exclusion des pensionnaires d'un établissement institutionnel, est inférieure à 250 personnes selon la base de données intégrales ou la base de données-échantillon, ou encore si le nombre de ménages privés est inférieur à 40, selon la base de données-échantillon.
- Les données renfermant une répartition du lieu du travail et les statistiques connexes sont supprimées si le nombre de personnes occupées dans la région est inférieur à 40, selon la base de données-échantillon. Si ces données incluent, en plus, une répartition du revenu, le seuil est changé à 250 personnes, toujours selon la base de données-échantillon.

- Les totalisations traitant à la fois du lieu de travail et du lieu de résidence ainsi que les statistiques connexes sont supprimées si le nombre de personnes occupées dans la région est inférieur à 40 selon la base de données-échantillon ou si la population totale de la région, à l'exclusion des pensionnaires d'un établissement institutionnel, selon la base de données intégrales ou la base de données-échantillon est inférieure à 40 personnes. Si ces totalisations incluent, en plus, une répartition du revenu, le seuil est changé à 250 personnes dans tous les cas et les totalisations sont supprimées si le nombre de ménages privés dans la région du lieu de résidence est inférieur à 40.
- Les données renfermant une répartition sur les couples de même sexe et les statistiques connexes sont supprimées si la population de la région dans les ménages privés est inférieure à 5 000 personnes, selon la base de données-échantillon.
- Si les données sont totalisées à partir de la base de données intégrales et se réfèrent aux codes postaux de six caractères ou encore à des regroupements d'îlots ou de côtés d'îlots, elles sont supprimées si la population totale de la région est inférieure à 100 personnes.
- Si les données sont totalisées à partir de la base de données-échantillon et se réfèrent aux codes postaux de six caractères ou encore à des regroupements d'îlots ou de côtés d'îlots, elles sont supprimées si la population totale de la région, à l'exclusion des pensionnaires d'un établissement institutionnel, et selon la base de données intégrales ou la base de données-échantillon, est inférieure à 100 personnes.
- Si les données se réfèrent à des regroupements d'îlots ou de côtés d'îlots, et renferment une répartition du lieu de travail, elles sont supprimées si le nombre de personnes occupées dans la région est inférieur à 100 selon la base de données-échantillon.
- Si les données se réfèrent à des regroupements d'îlots ou de côtés d'îlots, et renferment, à la fois, une répartition du lieu de travail et du lieu de résidence, elles sont supprimées si le nombre total de personnes occupées dans la région est inférieur à 100 selon la base de données-échantillon ou si la population totale de la région, à l'exclusion des pensionnaires d'un établissement institutionnel, selon la base de données intégrales ou la base de données-échantillon, est inférieure à 100 personnes.

Dans tous les cas, les données supprimées sont incluses dans les totaux ou totaux partiels du niveau d'agrégation supérieur approprié.

La technique de suppression est appliquée à tous les produits renfermant des données infraprovinciales (c'est-àdire la série des Profils, les tableaux croisés de base, les produits personnalisés et semi personnalisés), qu'il s'agisse de données intégrales ou de données-échantillon.

Pour obtenir de plus amples renseignements sur la qualité des données du recensement, veuillez communiquer avec la Division des méthodes d'enquêtes sociales, Statistique Canada, Ottawa (Ontario), Canada K1A 0T6, ou en composant le (613) 951-4783.

# Notes spéciales

# Chiffres de population

Les chiffres de population du recensement de 2001 pour une région particulière représentent le nombre de Canadiens dont le domicile habituel est dans cette région, quel que soit l'endroit où ils se trouvent le jour du recensement. Sont également compris dans ces chiffres tous les Canadiens qui demeurent dans un logement de cette région le jour du recensement qui n'ont pas de domicile habituel ailleurs au Canada, de même que ceux qui sont considérés comme des « résidents non permanents » (voir les Notes spéciales). Dans la plupart des régions, la différence entre le nombre de résidents habituels et le nombre de résidents qui demeurent dans cette région le jour du recensement est minime. Toutefois, à certains endroits, notamment dans des régions touristiques ou de villégiature, ou dans celles où l'on trouve d'importants camps de travail, le nombre de personnes qui demeurent dans la région à n'importe quel moment pourrait être bien supérieur au nombre de résidents habituels dont il est ici fait mention. Les chiffres de population tiennent compte des Canadiens qui habitent dans d'autres pays, mais non pas des résidents étrangers qui habitent au Canada (la catégorie des « résidents étrangers » ne comprend pas les « résidents non permanents » [voir les Notes spéciales]). Compte tenu de ces divergences, les utilisateurs ne doivent pas déduire que les chiffres de population correspondent au nombre de personnes qui habitent dans les logements déclarés.

# Comparabilité des données de 2001 sur le lieu de travail

Le travail à domicile peut être mesuré de différentes façons. Dans le cadre du recensement, la catégorie des personnes travaillant à domicile comprend les personnes qui résident et travaillent au même endroit, comme les agriculteurs, les télétravailleurs et les travailleurs d'un camp de chantier. Par ailleurs, selon les instructions données dans le Guide du recensement de 2001, les personnes ayant travaillé à domicile une partie du temps et à l'adresse d'un employeur le reste du temps devaient indiquer qu'elles avaient travaillé à domicile si elles avaient travaillé la majeure partie du temps chez elles (par exemple trois jours sur cinq).

D'autres enquêtes de Statistique Canada, telles que l'Enquête sociale générale, l'Enquête sur la dynamique du travail et du revenu et l'Enquête sur le milieu de travail et les employés, recueillent également des données sur les personnes travaillant à domicile. Toutefois, les données de ces enquêtes ne sont pas directement comparables à celles du recensement, étant donné que dans le cadre des enquêtes, les répondants doivent indiquer s'ils font une partie ou la totalité de leur travail rémunéré à domicile, alors qu'au recensement, ils doivent indiquer où ils travaillent habituellement la plupart du temps. Par conséquent, les estimations du travail à domicile tirées du recensement sont inférieures à celles tirées des enquêtes.

La présentation de la question sur le lieu de travail est demeurée à peu près la même pour chaque recensement depuis 1971. Cependant, en 1996, la catégorie « Sans adresse de travail fixe » a remplacé la catégorie « Sans lieu habituel de travail ». Sur le questionnaire du recensement de 1996, une case à cocher a été ajoutée pour la catégorie de réponse « Sans adresse de travail fixe ». Lors des recensements antérieurs, les répondants devaient inscrire « Sans lieu habituel de travail » dans les zones réservées à l'adresse. Il semble y avoir eu un sous-dénombrement des personnes sans lieu de travail fixe lors des recensements antérieurs.

Les annexions, les incorporations et les fusions de municipalités pourraient rendre difficile l'établissement de comparaisons entre des unités et des structures spatiales qui changent dans le temps.

# Données sur l'immigration et la citoyenneté

Les questions sur la citoyenneté et l'immigration n'ont pas été posées aux personnes qui vivent sur des réserves indiennes et dans des établissements indiens et qui ont été dénombrées à l'aide du questionnaire 2D du recensement de 2001. Par conséquent, les données ne sont pas affichées pour les réserves indiennes et les établissements indiens aux niveaux géographiques inférieurs. Toutefois, ces données sont comprises dans les totaux pour les plus grandes régions géographiques, telles que les divisions de recensement et les provinces.

# Données sur la migration pour les petites régions géographiques

Les chiffres estimatifs sur la migration interne peuvent manquer d'exactitude pour les petites régions géographiques, pour les localités ayant le même nom que d'autres localités situées ailleurs et pour certaines subdivisions de recensement (SDR) dans les cas où des résidents, au lieu d'indiquer le nom de la composante SDR dans laquelle ils résidaient auparavant, ont fourni le nom de la région métropolitaine de recensement ou de l'agglomération de recensement.

#### Identité autochtone

Les utilisateurs doivent prendre note du fait que le dénombrement partiel de certaines réserves indiennes ou de certains établissements indiens a une plus grande incidence sur les chiffres de population associés à la présente variable que sur la plupart des autres chiffres. L'ampleur de cette incidence sera fonction de la région géographique à l'étude. En 2001, un total de 30 réserves indiennes et établissements indiens ont été partiellement dénombrés dans le contexte du recensement. Les chiffres du recensement ne tiennent pas compte des populations de ces 30 collectivités.

#### Incidence de la restructuration municipale

Il est possible que les limites et les noms des municipalités (subdivisions de recensement) soient modifiés d'un recensement à un autre par suite d'annexions, de dissolutions et d'incorporations. Le nombre et l'importance de ces modifications ont toutefois augmenté depuis le recensement de 1996, surtout au Québec, en Ontario et en Colombie-Britannique. En général, les données du recensement de 2001 sont diffusées pour un plus petit nombre de subdivisions de recensement de plus grande taille, ce qui a pour effet de compliquer les analyses historiques. Afin d'atténuer l'impact de ces modifications sur la diffusion des données, l'équipe du recensement de 2001 entend produire un profil pour les subdivisions de recensement dissoutes.

# Modifications apportées aux concepts relatifs à la famille pour le recensement de 2001

Au recensement de 1996, la définition du concept de famille de recensement était la suivante :

Couple actuellement marié (avec ou sans fils et/ou filles jamais mariés des deux conjoints ou de l'un d'eux), couple vivant en union libre (avec ou sans fils et/ou filles jamais mariés des deux partenaires ou de l'un d'eux) ou parent seul (peu importe son état matrimonial) demeurant avec au moins un fils ou une fille iamais marié(e).

La définition de ce concept n'avait pas été modifiée depuis 1976. Toutefois, au cours de la planification du recensement de 2001, il a été décidé qu'il était nécessaire de le modifier compte tenu des facteurs suivants : 1) les changements apportés aux lois fédérales et provinciales afin que les couples formés de partenaires de même sexe soient considérés sur un pied d'égalité avec les couples formés de partenaires de sexe opposé vivant en union libre, plus particulièrement le Projet de loi C-23, Loi sur la modernisation de certains régimes d'avantages et d'obligations, qui a été adopté par le gouvernement du Canada en 2000; 2) les recommandations des Nations Unies dans le cadre d'un processus de normalisation des concepts pour les recensements qui devaient être réalisés en 2000 et en 2001 dans les pays membres; 3) le fait qu'aux recensements précédents un nombre important de personnes âgées de moins de 15 ans aient été classées comme personnes hors famille.

Par conséquent, les changements suivants ont été apportés au concept de famille de recensement pour le recensement de 2001 :

- Deux personnes constituant un couple en union libre formé de partenaires de même sexe et tous les enfants faisant partie de leur ménage sont considérés comme une famille de recensement.
- Les enfants compris dans une famille de recensement peuvent avoir déjà été mariés (pourvu qu'ils n'habitent actuellement pas avec leur époux(se) ou partenaire en union libre). Auparavant, il fallait qu'ils n'aient jamais été mariés.

- Un petit-fils ou une petite-fille vivant dans un ménage à trois générations où le parent (deuxième génération) n'a jamais été marié est, contrairement aux recensements précédents, maintenant considéré(e) comme faisant partie de la famille de recensement du parent, à condition de ne pas habiter avec son époux(se), son/sa partenaire en union libre ou son enfant. Auparavant, la famille de recensement était ordinairement constituée des deux générations les plus anciennes.
- Un petit-fils ou une petite-fille d'un autre membre du ménage où le parent (deuxième génération) n'est pas présent est maintenant considéré(e) comme faisant partie de la famille de recensement du grand-père ou de la grand-mère, à condition que le petit-fils ou la petitefille n'habite pas avec son époux(se), son/sa partenaire en union libre ou son enfant. Auparavant, un tel petit-fils ou une telle petite-fille n'aurait pas été considéré(e) comme faisant partie de la famille de recensement.

Les trois dernières modifications apportées (définition du terme « enfant ») se traduisent par une augmentation de 1,5 % du nombre total de familles de recensement, et une augmentation de 10,1 % du nombre de familles monoparentales. L'inclusion de couples formés de partenaires de même sexe se traduit par une augmentation de 0,4 % du nombre de familles de recensement à l'échelle nationale.

Le terme famille économique désigne un groupe de deux personnes ou plus qui vivent dans le même logement et qui sont apparentées par le sang, par alliance, par union libre ou par adoption. Cette définition n'a pas été modifiée pour le recensement de 2001. La seule incidence des changements sur le concept de famille économique est que les couples formés de partenaires de même sexe sont maintenant considérés comme étant des partenaires en union libre et donc considérés comme étant apparentés et membres de la même famille économique.

Deux concepts connexes ne faisant pas partie de l'univers des familles sont touchés par la modification apportée à la définition du concept de famille de recensement : union libre et genre de ménage. Avant 2001, deux personnes vivant ensemble comme mari et femme sans être mariées étaient considérées comme formant un couple en union libre. Pour 2001, l'expression « comme mari et femme » a été remplacée par « comme couple » de sorte que les partenaires de même sexe sont maintenant inclus. Le concept de genre de ménage renvoie à la répartition fondamentale des ménages privés en ménages familiaux et en ménages non familiaux. Comme il est fondé sur le concept de famille de recensement, la modification apportée à ce dernier concept a une incidence sur le classement des ménages en ménages familiaux ou non familiaux. La classification détaillée de cette variable est également touchée puisque les couples mariés et les couples en union libre étaient répartis auparavant entre les catégories « sans fils ou filles jamais mariés » et « avec fils ou filles jamais mariés ». En 2001, ces expressions sont remplacées par les termes « sans enfant » et « avec enfants » conformément à la nouvelle définition.

# Modifications aux chiffres de population et des logements

Suite à la diffusion des chiffres de population et des logements, des erreurs sont occasionnellement relevées dans les données. Il est impossible d'apporter des changements aux données du recensement de 2001 qui sont présentées dans ces tableaux. Toutefois, les utilisateurs peuvent obtenir les modifications aux chiffres de population et des logements touchant les subdivisions de recensement et d'autres niveaux géographiques en visitant la section consacrée au recensement de 2001 dans le site Web de Statistique Canada à l'adresse suivante : www.statcan.ca. Ils peuvent également communiquer avec le centre régional de consultation de Statistique Canada le plus près au numéro 1 800 263-1136 ou par courriel à infostats@statcan.ca.

#### Nunavut

Des données du recensement de 2001 sont disponibles pour le Nunavut, nouveau territoire reconnu officiellement le 1er avril 1999.

Les produits de données normalisés diffusés seulement pour le Canada, les provinces et les territoires n'afficheront pas de données pour le Nunavut pour les années de recensement antérieures à 2001.

Les produits de données normalisés diffusés pour les régions métropolitaines de recensement (RMR) et les agglomérations de recensement (AR) afficheront des données pour le Nunavut pour les recensements de 2001, 1996 ou 1991.

Les données de 1996 et de 1991 pour les RMR/AR ont été ajustées le plus possible selon les limites des RMR et des AR de 2001 afin de faciliter les comparaisons de données selon les limites géographiques de 2001.

#### Période de référence du revenu

Des recensements canadiens ont eu lieu en 1996 et en 2001. Les données de ces recensements portant sur le revenu correspondent à l'année civile précédant l'année du recensement, c.-à-d. 1995 et 2000 respectivement.

# Population de 15 ans et plus ayant travaillé depuis 2000

Ce sont les personnes ayant travaillé depuis le 1<sup>er</sup> janvier 2000, qu'elles aient fait partie ou non de la population active pendant la semaine de référence.

Qualité des données – Comparaison des estimations du revenu tirées du recensement avec des estimations établies à partir des comptes nationaux et de l'Enquête sur la dynamique du travail et du revenu

Les estimations du revenu agrégé en 2000 qui ont été tirées du recensement ont été comparées à des estimations semblables du revenu des particuliers établies à partir des comptes nationaux. Une fois que les estimations du revenu des particuliers ont été ajustées pour tenir compte des différences touchant les concepts et la couverture, on a observé que les estimations du revenu agrégé en 2000 qui sont tirées du recensement sont inférieures de 4,1 % à celles qui sont établies à partir des comptes nationaux. Comme par le passé, les estimations tirées du recensement soutiennent davantage la comparaison pour certaines composantes du revenu et pour certaines provinces que pour d'autres.

Dans le cas des salaires et traitements agrégés, qui constituent la plus grande composante du revenu, les estimations tirées du recensement et celles établies à partir des comptes nationaux sont presque identiques. Bien qu'il y ait une grande différence entre les deux estimations du revenu net provenant d'un travail autonome agricole (la plus petite composante du revenu des particuliers), dans le cas du revenu agrégé provenant d'un travail autonome agricole et d'un travail non agricole, les estimations du recensement ne sont inférieures que de 1 %. Dans l'ensemble, les estimations du revenu d'emploi total tirées du recensement et celles établies à partir des comptes nationaux sont quasi identiques.

Les estimations des prestations de la sécurité de la vieillesse et du supplément de revenu garanti qui sont tirées du recensement sont supérieures d'environ 5 % aux estimations ajustées établies à partir des comptes nationaux. En revanche, les estimations tirées du recensement leur sont inférieures d'environ 9 % dans le cas des prestations du Régime de rentes du Québec ou du Régime de pensions du Canada, et d'environ 6 % dans le cas des prestations d'assurance-emploi. Pour ce qui est des prestations fiscales canadiennes pour enfants, les deux estimations sont quasi identiques. Les estimations des autres transferts gouvernementaux tirées du recensement, qui incluent notamment les allocations sociales, les prestations provinciales de supplément du revenu aux personnes âgées, les pensions d'ancien combattant et les remboursements de la TPS/TVH/TVQ, sont plus faibles que les estimations tirées des comptes nationaux. Dans l'ensemble, les estimations du revenu agrégé tirées du recensement, qui proviennent de tous les transferts gouvernementaux, sont inférieures d'environ 13 %. Comme aux recensements antérieurs, l'estimation du revenu de placement tirée du recensement est de beaucoup inférieure, soit de 32 % en 2000, à l'estimation tirée des comptes nationaux.

Les statistiques du recensement sur le revenu ont également été comparées à des statistiques similaires tirées de l'Enquête sur la dynamique du travail et du revenu (EDTR), qui est tenue chaque année. Les estimations tirées de l'EDTR ont été ajustées pour tenir compte du sous-dénombrement de la population, alors que ce n'est pas le cas pour les estimations du recensement. Cette correction contribue à faire en sorte que les estimations tirées du recensement affichent, par rapport à celles de l'EDTR, un nombre moins élevé de bénéficiaires d'un revenu et de soutiens économiques, qui présente un écart de 3,4 % et de 7,2 % respectivement. Par conséquent, les estimations tirées du recensement sont inférieures à celles de l'EDTR, de 4 % dans le cas des gains agrégés et de 3 % dans le cas du revenu total agrégé des particuliers. À la lumière des erreurs d'échantillonnage dans l'EDTR, la plupart des différences observées entre les provinces ont été jugées acceptables.

# Qualité des données concernant la fréquentation scolaire

La qualité générale des variables de l'éducation du recensement de 2001 est acceptable. Toutefois, il importe aux usagers des données du recensement de 2001 sur la fréquentation scolaire de savoir que les chiffres pour la catégorie des 15 à 19 ans qui ne fréquentent pas l'école sont peut-être trop élevés. La proportion de personnes âgées entre 15 et 19 ans qui ont répondu qu'elles n'avaient pas fréquenté l'école au cours de l'année scolaire avant le recensement est passée de 18 % en 1996 à 23 % en 2001. Il est nécessaire d'effectuer de plus amples recherches à cet effet.

# Résidents non permanents

En 1991, 1996 et 2001, le Recensement de la population a dénombré à la fois les résidents permanents et non permanents au Canada. Les résidents non permanents sont les personnes qui, au moment du recensement, étaient titulaires d'un permis de séjour pour étudiants, d'un permis de travail ou d'un permis ministériel, ou qui revendiquaient le statut de réfugié. Les membres de leur famille vivant avec elles sont aussi considérés comme des résidents non permanents.

Avant 1991, seuls les résidents permanents du Canada étaient inclus dans le recensement (exception faite pour 1941). Les résidents non permanents étaient considérés comme des résidents étrangers et n'étaient pas dénombrés.

Présentement au Canada, les résidents non permanents forment un segment important de la population, en particulier dans plusieurs régions métropolitaines de recensement. Leur présence peut influer sur la demande de services gouvernementaux tels que les soins de santé, l'éducation, les programmes d'emploi et la formation linguistique. L'inclusion des résidents non permanents au recensement facilite la comparaison avec les statistiques provinciales et territoriales (mariages, divorces, naissances et décès) qui incluent cette population. En outre, l'inclusion des résidents non permanents permet au Canada de mieux refléter la recommandation de l'ONU, à savoir que les résidents à long terme (personnes demeurant dans un pays pour un an ou plus) soient dénombrés au recensement.

Le recensement de 1996 a dénombré 166 715 résidents non permanents au Canada, soit 0,6 % de la population totale. Le nombre avait augmenté quelque peu au recensement de 2001 : 198 645 résidents non permanents, soit 0,7 % de la population totale.

Le total des chiffres de population, de même que ceux de toutes les variables, sont touchés par ce changement apporté à l'univers du recensement. Les utilisateurs doivent faire preuve d'une très grande prudence lorsqu'ils comparent des données de 1991, de 1996 ou de 2001 avec celles de recensements antérieurs pour des régions géographiques où la concentration de résidents non permanents est importante. Celles-ci comprennent les principales régions métropolitaines de recensement de l'Ontario, du Québec et de la Colombie-Britannique.

Même si tous les efforts possibles ont été déployés pour dénombrer les résidents non permanents, des facteurs tels que les problèmes linguistiques, la réticence à remplir un formulaire du gouvernement ou à comprendre l'importance de participer peuvent avoir influé sur le dénombrement de cette population.

#### Secteurs de recensement en Ontario

On a décelé, dans la base de données, une erreur qui touche la présentation des chiffres de population de 1996 pour deux secteurs de recensement (SR), c'est-à-dire les SR 0520.05 et 0520.06, dans la région métropolitaine de recensement (RMR) de Toronto. Les données pour ces SR sont correctes, mais elles ont été inversées : 0520.05 contient les données de 0520.06 et 0520.06 contient les données de 0520.05. En raison de contraintes opérationnelles, il n'a pas été possible d'effectuer des ajustements à la base de données de 1996 (chiffres ajustés) pour ces deux SR. Il importe de faire preuve de prudence dans l'utilisation de ces données.

# Suppression des données sur le revenu

Dans le cadre de la suppression des régions, toutes les données caractéristiques se rapportant aux régions géographiques dont la population est inférieure à une taille donnée sont supprimées. Les données renfermant une répartition du revenu et les statistiques connexes sont supprimées si la population de la région, à l'exclusion des pensionnaires d'un établissement institutionnel, est inférieure à 250 personnes selon la base de données intégrales ou la base de données est inférieur à 40, selon la base de données-échantillon.

#### Type de construction résidentielle

Au recensement de 2001, on a recueilli des données sur deux nouvelles catégories de la variable Type de construction résidentielle :

Appartement avec accès direct au niveau du sol dans un immeuble de moins de cinq étages et appartement sans accès direct au niveau du sol dans un immeuble de moins de cinq étages.

L'évaluation postcensitaire des données a révélé un problème grave d'erreur de classement pour ces types de logements. Par conséquent, les données ne seront pas diffusées.

Les données sur le type « Appartement dans un immeuble de moins de cinq étages » sont diffusées dans les produits du recensement de 2001. Cette catégorie constitue un regroupement des deux nouvelles catégories susmentionnées, et les données correspondantes sont directement comparables avec celles de la même catégorie utilisée aux recensements précédents et ne posent en outre aucun problème.

# Annexe 1. Réserves indiennes et établissements indiens partiellement dénombrés, chiffres de population de 1996 et de 1991

| Province             | Réserves indiennes et établissements indiens partiellement dénombrés, 2001             | Population |      |  |
|----------------------|--|------------|------|--|
|                      |  | 1996       | 1991 |  |
| Québec               | Akwesasne (Partie)   | 1          | 9    |  |
|                      | Doncaster 17   | 0          | 4    |  |
|                      | Kahnawake 14   | 1          |      |  |
|                      | Kanesatake   | ¶          |      |  |
|                      | Lac-Rapide   | 228        | •    |  |
| ntario               | Akwesasne (Part) 59 (formerly Akwesasne [Part])  | <b>¶</b>   | •    |  |
|                      | Bear Island 1  | 153        |      |  |
|                      | Chippewas of the Thames First Nation 42 (formerly Chippewa of the Thames First Nation) | 1          |      |  |

Pour obtenir de plus amples renseignements sur les règles de suppression du recensement de 2001, se reporter à « Qualité des données » de la section « Documents de référence » de cette publication.

Pour les caractéristiques de la population des subdivisions de recensement supprimées, se reporter à la publication « Un aperçu national, chiffres de population et des logements » (n° 93-360-XPB au catalogue).

#### Centres régionaux de consultation

La Division des services consultatifs de Statistique Canada vous offre un réseau de diffusion de l'information qui couvre tout le Canada au moyen de huit centres régionaux de consultation. Chaque centre de consultation possède une série de publications courantes et des documents de référence qui peuvent être consultés ou achetés, de même que des disquettes, des CD-ROM, des cartes et d'autres produits. On peut photocopier sur place les documents imprimés.

Chaque centre de consultation vous offre un vaste éventail de services additionnels. Les services consultatifs peuvent vous aider à identifier vos besoins en information, établir des sources de données disponibles, consolider et intégrer des données de différentes sources, élaborer des profils, analyser les faits saillants et les tendances, et finalement, offrir de la formation sur les produits, les services, les concepts de Statistique Canada et l'utilisation de données statistiques.

Pour de plus amples renseignements, veuillez composer le numéro sans frais ci-dessous ou envoyer un courriel à infostats@statcan.ca

#### Contactez-nous

Numéro sans frais pour les demandes de renseignements (Canada et les États-Unis) : 1 800 263-1136

ATS: 1 800 363-7629

Numéro sans frais pour commander seulement (Canada et les États-Unis): 1 800 267-6677

Numéro sans frais **pour commander par télécopieur** (Canada et les États-Unis) : 1 877 287-4369

Courriel: infostats@statcan.ca
